Sahaj Bhadja

(213) 284-4651 sahaj.bhadja@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack Software Engineer with 2+ years building **Python** and **Django** backends with **React** frontends, REST APIs over HTTP, HTML and CSS, unit and end-to-end testing, debugging, code reviews, and booking and payment workflows.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Built **Python** FastAPI services and integration pipelines across PostgreSQL, SQL Server, and cloud storage with validation and CI/CD-backed releases, sustaining 99%+ reliability over 5K+ monthly production jobs for 500+ users.
- Improved **performance** of a multi-tenant platform for 500+ users by tuning schemas and indexed queries, cutting dashboard latency from 1.2s to 350ms, and tripled async job throughput across 1K+ jobs.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Built a **React** dashboard and Python Flask REST APIs for upload, rubric, and grading workflows on AWS, serving 150+ instructors and 10K+ daily requests through GitHub Actions CI/CD.
- **Troubleshot** OCR timeouts and model failures in production with fallback routing and multithreaded batch processing, keeping APIs stable at peak load and cutting instructor feedback turnaround 60% across 10K+ submissions.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Wrote 20+ automated **unit and integration test** suites with PyTest and Mockito that ran nightly in Jenkins across Windows, Linux, and macOS, with coverage reports and failure logs for the team.
- Improved REST API **scalability** for low-bandwidth users with pagination, field filtering, and caching, cutting response times 30% and technical debt 20% while collaborating in Agile sprints with Microsoft and GitHub stakeholders.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built a **Django and React** customer-records platform with REST APIs, role-based access, billing, and lead management, syncing 2M+ records across multiple locations with real-time WebSocket updates for every site.
- Took part in **code review** and rollout across 6+ workflows, gating releases on PyTest unit tests and Selenium **end-to-end tests** in Jenkins CI/CD, reaching 95%+ successful build validation.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built **booking** APIs for a home-services marketplace covering time slots, reservation tracking, pricing, and coupons, with transactional locking to prevent double bookings of shared time slots across 50K+ booking records.
- Built a React and TypeScript dashboard with Flask APIs and Firebase real-time status updates, keeping responses under 200ms, and automated refunds through idempotent **payment** webhooks, cutting manual handling about 70%.

Skills

Languages: Python, JavaScript, TypeScript, SQL, HTML, CSS, Java
Web: Django, Flask, FastAPI, React, Next.js, REST APIs, HTTP, WebSockets, TailwindCSS
Data: PostgreSQL, MySQL, SQL Server, MongoDB, Firebase, Query Optimization
Testing & Quality: PyTest, Jest, Selenium, Unit Testing, End-to-End Testing, Debugging, Code Reviews
Tools: Git, GitHub Actions, Jenkins, CI/CD, Docker, AWS, Linux, Agile, Postman, Kubernetes, Responsive Design

Projects

Apartment Tour Scheduling App | *Python, Django REST, React, PostgreSQL, Playwright*

- Designed a **Django** and React app where renters book self-guided or agent-led tours from live availability, receive reminders, and leasing agents manage their calendars, covered by **end-to-end tests**.

Renter Lead Inbox | *Django, Celery, React, PostgreSQL, LLM APIs*

- Designed a shared **inbox** that collects renter inquiries from email and listing sites, deduplicates leads, and drafts AI replies with available units that leasing agents **review** before sending.

HMIS – Hospital Management Information System Live | *MERN, TypeScript, Twilio, TailwindCSS*

- Won Smart India Hackathon with an **appointment** platform supporting booking, rescheduling, and cancellation, doctor dashboards, and Twilio SMS reminders and confirmations, reducing hospital administrative workload 30% across 100+ daily appointments.
