Sahaj Bhadja

(213) 284-4651 sahaj.bhadja@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Forward Deployed Software Engineer with 2+ years delivering **Python/TypeScript solutions**, **enterprise API integrations**, production AI workflows, and customer-focused technical implementations.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Advanced NLP, Web Technologies, Database Systems, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Data Retrieval, Operating Systems

Experience

USC Dornsife **September 2025 – Present**
Forward Deployed Software Engineer *Los Angeles, CA*

- Translated stakeholder workflows into **customer-facing FastAPI integrations**, normalized schemas, and indexed dashboards for 500+ users, reducing latency from 1.2 seconds to 350 milliseconds through iterative solution delivery.
- Rebuilt asynchronous AI orchestration with explicit job states, failure isolation, and monitoring, processing 1K+ jobs at 3x throughput while improving **production reliability and stakeholder-visible operational outcomes** consistently.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Delivered React and Flask workflows for uploads, model selection, grading history, and feedback, supporting 150+ instructors and 10K+ daily requests through **customer-focused iteration and production API ownership**.
- Integrated GPT-4o, Claude, and Qwen-VL behind configurable workflows with OCR fallbacks, token tracking, and concurrent execution, reducing feedback turnaround 60% while **resolving urgent production issues** with teammates.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer - (SecureSync) *India*

- Owned complex API and ETL integrations from requirements through deployment, improving response times 30% and pipeline efficiency 68% through **customer issue diagnosis, solution architecture, and cross-functional delivery**.
- Collaborated with Microsoft and GitHub stakeholders during Agile releases, automating 20+ unit and integration suites across three operating systems while strengthening **technical communication, validation, and support readiness**.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern - (VibrantChem) *India*

- Built eight modular services and React interfaces for authentication, resources, billing, and notifications, synchronizing 2M+ records through **REST APIs, WebSockets, and customer-facing real-time workflows** across locations reliably.
- Automated Docker and Jenkins releases, reducing deployment time 50% while using Sentry, Azure Monitor, and Kibana to **troubleshoot integrations, communicate risks, and maintain reliable production services** reliably.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Translated client requirements into technical specifications for 12+ integrations, mapping bookings, payments, coupons, and status workflows before implementation to **reduce design errors 25% and align customer expectations**.
- Built Flask APIs and Firebase synchronization across 50K+ booking records, supporting sub-200-millisecond responses while presenting progress, risks, and architecture decisions through **direct client and stakeholder collaboration** consistently.

Skills

Languages & Applications: Python, TypeScript, JavaScript, SQL, React, Flask, FastAPI, Node.js
APIs & Integrations: REST APIs, Webhooks, JSON, API Authentication, Async Processing, Sync Processing, Callbacks, OCR, Multimodal AI
Customer Engineering: Solution Architecture, Requirements Discovery, Technical Support, Issue Triage, Stakeholder Communication, Success Metrics, KPIs, Adoption Analytics
Data & Cloud: PostgreSQL, MySQL, SQL Server, Firebase, AWS, Azure, S3, Cloud Storage, ETL, Data Validation
Delivery & Reliability: Docker, CI/CD, Jenkins, GitHub Actions, Git, PyTest, Integration Testing, Monitoring, Logging, Documentation, Agile

Projects

Integration Console | *Python, TypeScript, FastAPI, React, Webhooks, PostgreSQL*

- Designed an **enterprise AI integration console** for configuring API credentials, synchronous requests, asynchronous callbacks, customer metadata, retry policies, usage dashboards, and auditable rollout checklists across multiple client environments.

Policy Gateway | *Python, FastAPI, OCR, Multimodal Models, Rules Engine, Monitoring*

- Built a **content-policy orchestration service** that routes text and media to configurable models, evaluates confidence thresholds and metadata rules, records decisions, handles webhooks, and surfaces actionable integration diagnostics.

Chat2SQL | *Java, TypeScript, REST APIs, SQL, Docker, PostgreSQL*

- Extended an **AI-assisted database integration workspace** supporting 10+ databases, schema exploration, validated SQL generation, cross-platform deployment, and unified workflows across Java services and TypeScript interfaces for technical users.
