Sahaj Bhadja

(213) 284-4651 sahaj.bhadja@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years building **C#/.NET and TypeScript applications**, **secure data integrations**, production AI workflows, and scalable cloud services.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Web Technologies, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Data Retrieval, Operating Systems

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Architected a multi-tenant platform using Azure SQL and cloud storage with row-level isolation, supporting 500+ users while reducing dashboard latency 71% through **secure architecture, indexing, and query optimization**.
- Built fault-tolerant AI workflows with FastAPI workers, explicit job states, monitoring, and validation, processing 1K+ jobs at 3x throughput while strengthening **reliability, scalability, and production troubleshooting** consistently.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Delivered React and Flask features for uploads, grading history, model controls, and feedback, supporting 150+ instructors and 10K+ daily requests through **full-stack development, API testing, and iterative validation**.
- Developed concurrent Python ingestion for PDF, DOCX, ZIP, OCR, and multimodal models, processing 1K+ files per batch while reducing turnaround 60% through **automated testing and failure handling**.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer - (SecureSync) *India*

- Optimized distributed APIs and ETL integrations, improving response times 30% and pipeline efficiency 68% through **object-oriented design, structured validation, AWS Glue, S3, caching, and production debugging** reliably.
- Automated builds and 20+ unit and integration suites across Windows, Linux, and macOS using Jenkins, PyTest, Mockito, and virtual machines, strengthening **CI/CD, regression coverage, and release reliability**.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern - (VibrantChem) *India*

- Built eight **C# and ASP.NET Core microservices** for authentication, resources, billing, permissions, and notifications, synchronizing 2M+ records with React, WebSockets, REST APIs, and Azure SQL across locations.
- Automated Docker and Jenkins delivery, reducing deployment time 50% while applying unit tests, Sentry, Azure Monitor, and Kibana for **secure releases, observability, troubleshooting, and maintainable production operations**.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Translated client requirements into technical specifications for 12+ integrations, mapping bookings, payments, coupons, and status workflows before implementation to **reduce design errors 25% and improve delivery alignment**.
- Built Flask APIs and Firebase synchronization across 50K+ booking records, providing sub-200-millisecond responses while supporting **data validation, payment webhooks, technical documentation, and cross-functional stakeholder reviews** throughout delivery.

Skills

Languages & Frameworks: C#, .NET, ASP.NET Core, TypeScript, JavaScript, Python, SQL, React, Angular, Flask, FastAPI
Data & APIs: SQL Server, Azure SQL, PostgreSQL, MySQL, REST APIs, Webhooks, JSON, ETL, Data Validation, Data Modeling
Cloud & Delivery: Azure, AWS, Docker, CI/CD, Jenkins, GitHub Actions, Git, Cloud Storage, Deployment Automation
Quality & Security: Unit Testing, Integration Testing, PyTest, Mockito, Code Review, Debugging, Monitoring, Logging, Secure Development
Engineering: Software Architecture, OOP, Microservices, Scalability, Reliability, Performance, Maintainability, Agile, Documentation, AI-assisted Development

Projects

CareBridge | *C#, ASP.NET Core, React, SQL Server, Azure, HL7*

- Designed a **healthcare interoperability platform** that exchanges structured incident and encounter data, validates required fields, reconciles patient matches, records audit trails, and surfaces exceptions through secure role-based operational dashboards.

ReviewGate | *TypeScript, Python, React, FastAPI, CI/CD, AI Evaluation*

- Built an **AI-assisted development verification workflow** that checks generated code against acceptance criteria, tests, security rules, API contracts, and performance budgets while preserving human review and auditable approval decisions.

HMIS - Hospital Management Information System | *TypeScript, MERN, ABDM APIs, Sentry, Appwrite*

- Developed a **healthcare management platform** connecting patient records, appointments, billing, alerts, and ABDM APIs, with TypeScript services, role-based workflows, Sentry monitoring, and reliable operational data access for care teams.
