Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Recent MS Computer Science graduate building full-stack products with **React**, **Java**, **Python**, and Node.js, RESTful APIs on MySQL, PostgreSQL, and MongoDB, **Generative AI** features, and payment and fintech workflows in Agile teams.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **December 2025 – May 2026**
Software Engineer *Los Angeles, CA*

- Built Python services and **Generative AI** job orchestration for an education platform, with background workers and failure isolation processing 1K+ LLM jobs at 3x throughput without cascading failures.
- Designed multi-tenant **PostgreSQL** and Azure SQL schemas with row-level security for 500+ users, tuning indexed queries to cut dashboard latency from 1.2s to 350ms for every tenant.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Built and shipped a customer-facing **React** and Flask app with RESTful endpoints and MySQL on AWS, serving 150+ instructors and 10K+ daily requests with stable responses at peak load.
- Built rubric generation, OCR, and grading features using GPT-4o, Claude, and Qwen-VL with OCR fallbacks and cost tracking, reaching 90%+ consistency and cutting instructor **feedback turnaround** 60% overall.

Aasma Technology Solutions **January 2024 – May 2024**
Software Developer Engineer – SecureSync *India*

- Built **object-oriented** Java and Python modules with Singleton and Factory patterns, tested by 20+ automated unit and integration suites in nightly **Jenkins** pipelines across three operating systems.
- Optimized RESTful API integrations with pagination, field filtering, and caching, improving response times 30% and cutting technical debt 20% in **Agile Scrum** sprints with Microsoft and GitHub stakeholders.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built a **MERN** platform with React, Node.js, **Express**, and MongoDB microservices for customer records, billing, invoices, and payments, syncing 2M+ records across multiple locations with real-time WebSocket updates.
- Used analytics on feature usage and drop-off points to guide small fixes that cut resource wastage 42% and lifted lead conversions 15%, shipped through Jenkins CI/CD with automated tests.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built multi-currency **payment** flows for cards, wallets, and PayPal with idempotent webhooks for refunds and disputes, cutting manual refund handling about 70% across 50K+ booking and payment records in production.
- Built backends for **React Native** Android and iOS apps and a React TypeScript web dashboard with Firebase real-time updates, improving cross-platform compatibility 15% and confirmation speed 40%.

Skills

Languages: Java, Python, JavaScript, TypeScript, C++, SQL, HTML, CSS
Frontend & Mobile: React, Next.js, Angular.js, React Native, TailwindCSS
Backend: Node.js, Express.js, Spring Boot, Django, Flask, FastAPI, REST APIs, Microservices
Data & AI: MySQL, PostgreSQL, MongoDB, Firebase, Generative AI, LLM APIs, Prompt Engineering
Practices: Object-Oriented Design, Agile/Scrum, Git, Jenkins, CI/CD, Jest, PyTest, Code Reviews, AWS, Docker, Selenium, Linux

Projects

Small Business Invoice Assistant | *React, Java, Spring MVC, PostgreSQL, LLM APIs*

- Designed a React and **Spring MVC** app where small businesses create invoices, track overdue payments, and get **AI-drafted** reminder emails that owners review and approve before anything is sent.

Tax Document Organizer | *React Native, Node.js, Express, MongoDB, OCR*

- Designed a **React Native** app that scans receipts and tax forms with OCR, categorizes deductible expenses through an Express API, and shows a yearly **summary** ready for filing.

FinNexus Live | *Next.js, TypeScript, Plaid, MongoDB, Kubernetes*

- Built a personal **finance** platform with Plaid bank linking, real-time account updates, and transaction filtering, supporting 50,000+ users and 1M+ transactions with automated CI/CD deployments on Kubernetes.
