Sahaj Bhadja

(213) 284-4651 sahaj.bhadja@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with an MS in Computer Science and 2+ years building production services and clients in **C#/.NET**, **Java**, Python, and JavaScript across Windows, Linux, Android, and web, with safe releases, testing, and monitoring.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Operating Systems, Object-Oriented Programming, Software Engineering, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Designed multi-tenant storage on **Azure SQL** and Blob Storage with row-level security for 500+ users, keeping tenant data isolated and tuning queries to cut dashboard latency from 1.2s to 350ms.
- Built fault-tolerant background services with explicit job states and failure isolation, tripling throughput across 1K+ jobs, and shipped through **CI/CD**-backed releases at 99%+ reliability across 5K+ monthly production jobs.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Built and supported a production web application with a React client and Python services on AWS, serving 150+ instructors and **10K+ daily requests** with stable responses at peak load.
- Diagnosed OCR timeouts and model failures in production and added fallback routing and multithreaded batch processing, keeping the service **reliable** while cutting instructor feedback turnaround 60% for 150+ instructors.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Built **cross-platform** data-sharing client software tested nightly on Windows, Linux, and macOS VMs, with 20+ automated unit and integration suites and Jenkins builds across feature, staging, and production.
- Collaborated with **Microsoft** and GitHub stakeholders in Agile sprints, optimizing API integrations with pagination and caching to improve response times 30% while cutting technical debt 20% through refactoring.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built **C# .NET** microservices on Azure SQL and Azure App Services for authentication, role-based access, and notifications, syncing 2M+ records across locations with real-time WebSocket updates for every site.
- Released safely through Jenkins CI/CD with automated tests, approval gates, and zero-downtime rolling updates, and monitored with **Azure Monitor**, Sentry, and Kibana, cutting deployment time 50% across staged releases.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built backends for **Android** and iOS React Native clients and a web dashboard with Firebase real-time sync, improving cross-platform compatibility 15% and booking confirmation speed 40% across 50K+ booking records.
- Resolved wallet connectivity issues on Android and added wallet-signature **authentication** for passwordless login, removing password storage for 100% of wallet users across Android, iOS, and web clients.

Skills

Languages: C#, Java, Python, JavaScript, TypeScript, C++, SQL
Platforms: .NET, Windows, Linux, macOS, Android, React Native, React, Spring Boot, Kubernetes
Cloud & Services: Azure, Azure SQL, Azure App Services, Azure Monitor, Blob Storage, AWS, REST APIs, Microservices
Quality & Release: Unit Testing, Integration Testing, PyTest, Mockito, Selenium, CI/CD, Jenkins, Git
Practices: Object-Oriented Design, Design Patterns, Debugging, Agile, Docker, Sentry, Kibana, GitHub Actions

Projects

Device Compliance Policy Service | *C#, ASP.NET Core, Azure Functions, Cosmos DB*

- Designed a **C#** service that evaluates enrolled devices against admin policies such as OS version, encryption, and passcode rules, and reports non-compliant devices to administrators with clear remediation steps.

Managed App Policy Client | *Kotlin, Android, Chrome Extension, TypeScript*

- Designed an **Android** client and Chrome extension that fetch work-app policies, block copy-paste of company data into personal apps, and send compliance **status** back to the management service.

CPU-Scheduling Simulator Live | *C++, React.js, JavaScript, EJ-2*

- Implemented FCFS, SJF, SRT, Round Robin, priority, and multilevel queue **scheduling** in C++ with Gantt visualization, testing 1K+ process combinations and cutting average turnaround time 25% across test scenarios.
