# Sahaj Bhadja

(213) 284-4651 sahaj.bhadja@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

## Summary

Frontend-leaning full-stack engineer with 2+ years building **React** and **TypeScript** interfaces with responsive HTML and CSS, backed by **Java** and Python services on AWS, with automated testing, CI/CD, and security-focused development.

## Education

**University of Southern California, Los Angeles, CA** **August 2024 – May 2026**
*Master of Science in Computer Science* *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

**Pandit Deendayal Energy University, Gandhinagar, India** **November 2020 – May 2024**
*Bachelor of Technology in Computer Science and Engineering* *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

## Experience

**USC Dornsife** **September 2025 – Present**
*Software Engineer* *Los Angeles, CA*

- Designed multi-tenant **PostgreSQL** and Azure SQL storage with row-level security protecting each tenant's data for 500+ users, and tuned indexed queries to cut dashboard latency from 1.2s to 350ms.
- Built backend services and integration pipelines with validation and CI/CD-backed releases at 99%+ reliability, and **troubleshot** failing background jobs to triple throughput across 1K+ jobs without cascading failures.

**Grad8** **June 2025 – August 2025**
*Software Engineer Intern* *Los Angeles, CA*

- Built the **React** user interface for upload, rubric generation, grading, and grading-history views, wiring components to REST endpoints for 150+ instructors and 10K+ daily requests on AWS.
- Debugged issues from the UI down to backend services, adding fallback routing and multithreaded batch processing that kept the app responsive at peak load and cut feedback turnaround 60%.

**Aasma Technology Solutions** **August 2023 – July 2024**
*Software Developer Engineer – SecureSync* *India*

- Built object-oriented **Java** and Python **microservice** modules for data sharing, covered by 20+ unit and integration test suites in Mockito and PyTest run nightly in Jenkins CI/CD.
- Optimized REST APIs consumed by client apps with pagination, field filtering, and caching, improving response times 30% while planning and delivering work in Agile sprints with Microsoft stakeholders.

**Aasma Technology Solutions** **May 2023 – August 2023**
*Full Stack Developer Intern – VibrantChem* *India*

- Built responsive **TypeScript** React interfaces and Java Spring Boot APIs for customer records, billing, and role-based access, with real-time WebSocket updates syncing 2M+ records across multiple locations for every site.
- Wrote Jest unit tests and Selenium **end-to-end tests** gating Jenkins CI/CD, plus Snyk and OWASP security scans, reaching 95%+ successful build validation before approval-gated staging and production releases.

**LST Capitals** **November 2022 – January 2023**
*Web Developer Intern* *India*

- Designed system flows in Figma that cut design errors 25%, then built a responsive **React and TypeScript** dashboard for bookings and payments, improving cross-platform compatibility 15% across devices.
- Integrated the dashboard with Flask and Spring Boot APIs and Firebase real-time updates, keeping responses under 200ms across 50K+ records, and presented the architecture to the client.

## Skills

**Frontend:** React, TypeScript, JavaScript, HTML, CSS, Next.js, TailwindCSS, Responsive Design, Figma
**Backend:** Java, Spring Boot, Python, Flask, FastAPI, Node.js, REST APIs, Microservices, WebSockets
**Data & Cloud:** PostgreSQL, Azure SQL, MongoDB, AWS, Azure, Docker, Kubernetes
**Testing & Security:** Jest, Selenium, Mockito, PyTest, Unit Testing, Integration Testing, Snyk, OWASP
**Practices:** CI/CD, Jenkins, Git, Code Reviews, Agile, Object-Oriented Design, Debugging

## Projects

**Insider Risk Alerts Console** | *React, TypeScript, Playwright, Kotlin, Elasticsearch*

- Designed a **React** console where security analysts filter file-exfiltration alerts by user and risk level, view activity timelines, and resolve cases, with **Playwright** tests covering each flow.

**File Activity Events API** | *Kotlin, Spring Boot, PostgreSQL, AWS, Terraform*

- Designed a **Kotlin** service that ingests file-movement events, scores risky transfers to personal cloud storage, and exposes search APIs for the console, deployed on AWS with **Terraform**.

**FinNexus** Live | *Next.js, TypeScript, TailwindCSS, Kubernetes*

- Built a responsive **TypeScript** interface with Plaid bank linking, a token-based firewall, real-time updates, and transaction filtering, supporting 50,000+ users and 1M+ transactions with Next.js and TailwindCSS.
