Sahaj Bhadja

(213) 284-4651 sahaj.bhadja@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Developer with 2+ years coding, testing, and debugging business software in **multiple languages** including Python, Java, JavaScript, and SQL, with database work, **internal checks and controls**, clear documentation, and stakeholder collaboration.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Analysis of Algorithms, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Built data processing programs with **validation and reconciliation checks** across SQL Server, PostgreSQL, and cloud storage, catching bad records and sustaining 99%+ reliability over 5K+ monthly production jobs.
- **Analyzed program performance** on a multi-tenant platform for 500+ users and tuned schemas and indexed queries, cutting dashboard latency from 1.2s to 350ms while keeping each tenant's data confidential.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Built and modified Python and React programs for upload, rubric, and grading workflows with MySQL on AWS, serving 150+ instructors and 10K+ daily requests with stable responses at peak load.
- **Debugged** OCR timeouts and model failures reported by users, added fallback routing and multithreaded batch processing, and cut feedback turnaround 60% while documenting fixes for the team.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Tested every program change through 20+ automated unit and **integration test** suites in Java and Python, catching unwanted side effects in related modules before nightly Jenkins releases.
- Collaborated with stakeholders from requirements through deployment, modifying API integrations with pagination and caching to improve response times 30% and cutting technical debt 20% in Agile sprints.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built business programs for customer records, invoices, billing, and leads with role-based access and **encrypted** Azure SQL data, syncing 2M+ records across multiple locations in real time.
- Followed established release procedures with linting, automated tests, and approval gates in Jenkins CI/CD, and used analytics on drop-off points to cut resource wastage 42% through targeted fixes.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Implemented **business rules** for pricing and coupons that checked eligibility, expiry, and usage limits before recomputing totals, keeping booking responses under 200ms across 50K+ records for mobile and web users.
- Clarified data input and output requirements with the client, mapped 12+ integration points, and presented the system design before implementation, then automated refund handling to cut manual work 70%.

Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, C++, HTML, CSS
Data: SQL Server, PostgreSQL, MySQL, Azure SQL, Data Validation, Query Optimization, MongoDB, AWS, Azure
Development: REST APIs, Flask, FastAPI, Spring Boot, React, Debugging, Troubleshooting, Performance Tuning
Quality: Unit Testing, Integration Testing, PyTest, Mockito, Code Reviews, CI/CD, Jenkins, Git, Linux, Docker
Professional: Documentation, Requirements Analysis, Stakeholder Communication, Data Confidentiality, Agile

Projects

Insurance Policy Change Processor | *C#, .NET, SQL Server*

- Designed a batch program that applies **policy changes** such as added drivers and new vehicles, recalculates premiums, and logs every change with **control totals** for audit and review.

Claims Data Quality Checker | *Python, SQL, pytest*

- Designed a checker that validates incoming **claims** records for missing fields, invalid dates, and duplicate submissions, and produces an exception report for staff with clearly **documented** validation rules.

Chat2SQL Code | *Java, TypeScript, SQL Server, PostgreSQL, Docker*

- Extended a **multi-language** database workspace in Java and TypeScript supporting 10+ engines including SQL Server, with schema synchronization and generated SQL reaching 82% accuracy across Windows, macOS, and Linux.
