Sahaj Bhadja

(213) 284-4651 sahaj.bhadja@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years delivering **React applications**, **microservices**, REST APIs, cloud-native deployments, automated testing, and CI/CD across scalable customer-facing platforms and data-intensive systems.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Delivered well-scoped platform changes by translating stakeholder workflows into **FastAPI microservices** with explicit job states, failure isolation, and monitoring, processing 1K+ concurrent AI jobs at 3x throughput.
- Built multi-tenant data and integration pipelines across Azure SQL, PostgreSQL, SQL Server, and cloud storage, processing 5K+ monthly jobs with **validation, reconciliation, CI/CD, and 99%+ reliability** across production environments.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Built **customer-facing React and Flask features** for uploads, workflows, history, and feedback, supporting 150+ instructors and 10K+ daily requests while reducing turnaround time 60% through production releases.
- Implemented secure ingestion, concurrent processing, REST APIs, and model fallbacks; coordinated multi-environment deployments through **automated testing, GitHub Actions CI/CD, monitoring, and issue investigation** with documented rollback procedures.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer - (SecureSync) *India*

- Designed object-oriented microservices and large-scale API integrations, improving response times 30% while collaborating with Microsoft and GitHub teams through **Agile planning, code reviews, estimation, and release coordination**.
- Containerized cross-platform builds and automated **unit, integration, and deployment testing** with 20+ PyTest and Mockito suites, Jenkins pipelines, and VM validation, increasing pipeline efficiency 68% and reducing technical debt 20%.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern - (VibrantChem) *India*

- Built eight modular microservices for authentication, permissions, resources, billing, and notifications, using **REST APIs and event-driven WebSockets** to synchronize 2M+ records across distributed locations through secure services.
- Developed React and TypeScript interfaces with real-time dashboards, then supported releases through **Docker images, Jenkins CI/CD, Sentry monitoring, and troubleshooting** across eight customer-facing production services and environments.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Translated client requirements into **technical specifications and reusable architecture** for 12+ integrations, mapping booking, payment, coupon, and real-time status workflows before implementation to reduce design errors 25%.
- Built React and Flask transaction flows with Firebase, REST APIs, WebSockets, payments, and cross-platform delivery, supporting 50K+ records with **sub-200-millisecond API responses** during customer demonstrations and reviews.

Skills

Languages: JavaScript, TypeScript, Python, Java, SQL
Frontend & APIs: React, Next.js, Flask, FastAPI, Node.js, REST APIs, JSON, Microservices, WebSockets
Data Systems: MySQL, SQL Server, PostgreSQL, MongoDB, Redis, NoSQL, Data Modeling, Event-Driven Systems
Cloud & DevOps: Amazon Web Services, Azure, GCP, Kubernetes, Docker, CI/CD, Jenkins, GitHub Actions, Gitflow, Monitoring
Engineering: Agile, Scrum, Unit Testing, Integration Testing, Functional Testing, Code Reviews, Debugging, Release Management, Security, Observability, Requirements Analysis

Projects

AuctionFlow | *TypeScript, React, Node.js, PostgreSQL, Redis, WebSockets, Amazon Web Services, Kubernetes*

- Designed a **real-time digital marketplace** supporting inventory search, saved filters, bidding, purchase workflows, payments, and seller dashboards through WebSocket events, secured APIs, transactional persistence, and containerized services.

DeployGrid | *Docker, Kubernetes, GitHub Actions, Amazon Web Services, REST APIs, Automated Testing*

- Built a **multi-environment release toolkit** that creates versioned container images, executes unit and integration suites, validates service health, coordinates staged deployments, and records rollback-ready release evidence for distributed applications.

FinNexus | *Next.js, TypeScript, MongoDB, Plaid, WebSockets, Kubernetes* | Live

- Built a **secure transaction platform** supporting 50,000+ users and 1M+ transactions with Plaid bank linking, token-based protection, real-time WebSocket updates, responsive interfaces, and Kubernetes deployment automation across environments.
