Sahaj Bhadja

(213) 284-4651 sahaj.bhadja@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-Stack Software Engineer with 2+ years building **React/TypeScript products**, **Java and cloud services**, distributed integrations, and secure payment workflows.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Web Technologies, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Architected a multi-tenant platform using Azure SQL and cloud storage with row-level isolation, supporting 500+ users while reducing dashboard latency 71% through **secure architecture, indexing, and query optimization**.
- Built fault-tolerant AI workflows with FastAPI workers, explicit job states, monitoring, and validation, processing 1K+ jobs at 3x throughput while strengthening **distributed reliability, scalability, and production ownership**.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Delivered React and Flask features for uploads, grading history, model controls, and feedback, supporting 150+ instructors and 10K+ daily requests through **end-to-end product development, APIs, and customer-focused iteration**.
- Developed concurrent Python ingestion for PDF, DOCX, ZIP, OCR, and multimodal models, processing 1K+ files per batch while reducing turnaround 60% through **automated testing, debugging, and failure handling**.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer - (SecureSync) *India*

- Optimized distributed APIs and ETL integrations, improving response times 30% and pipeline efficiency 68% through **object-oriented design, validation, AWS Glue, S3, caching, and production troubleshooting** across releases.
- Automated builds and 20+ unit and integration suites across Windows, Linux, and macOS using Jenkins, PyTest, Mockito, and virtual machines, strengthening **CI/CD, regression coverage, and release reliability**.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern - (VibrantChem) *India*

- Built eight **Java/Kotlin Spring services and GraphQL APIs** for authentication, resources, billing, permissions, and notifications, synchronizing 2M+ records with React, WebSockets, PostgreSQL, and scalable cloud deployment workflows.
- Automated Docker and Jenkins delivery, reducing deployment time 50% while applying unit tests, Sentry, Azure Monitor, and Kibana for **secure releases, observability, troubleshooting, and maintainable production operations**.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Integrated **PCI-aligned payment workflows** supporting cards, UPI, wallets, PayPal, refunds, disputes, and real-time analytics, reducing manual payment handling 70% through secure, reliable, resilient transaction and webhook automation.
- Built backend APIs for bookings, pricing, coupons, and payment-status updates across 50K+ records, maintaining sub-200-millisecond responses while presenting **system architecture and integration decisions** directly to client stakeholders.

Skills

Languages & Frontend: TypeScript, JavaScript, Java, Kotlin, Python, SQL, React, HTML5, CSS3
Backend & APIs: Spring Boot, Node.js, FastAPI, Flask, GraphQL, REST APIs, Webhooks, Microservices, OOP
FinTech Systems: Lending, Loan Servicing, Repayments, Payments, AutoPay, Idempotency, Transaction Processing, Audit Trails
Data & Cloud: PostgreSQL, MySQL, SQL Server, MongoDB, Redis, AWS, Azure, GCP, S3, Distributed Systems
Engineering: Docker, Kubernetes, CI/CD, Jenkins, GitHub Actions, Git, Unit Testing, Integration Testing, Monitoring, Debugging, AI-assisted Development

Projects

CreditFlow | *Java, Kotlin, Spring Boot, GraphQL, React, PostgreSQL*

- Designed a **lending origination and servicing platform** with eligibility decisions, account state transitions, repayment schedules, GraphQL APIs, immutable audit events, and customer-facing React workflows for transparent borrowing lifecycle management.

RepayGuard | *TypeScript, React, Java, AWS, PostgreSQL, Event-Driven Systems*

- Built a **reliable repayment orchestration system** supporting AutoPay, idempotent payment processing, retries, reversals, balance reconciliation, notifications, and operational monitoring through event-driven services and independently testable financial invariants.

FinNexus | *TypeScript, Next.js, Plaid, MongoDB, WebSockets, Kubernetes* | Live

- Built a **secure financial platform** supporting 50K+ users and 1M+ transactions with Plaid bank linking, token-based access, real-time synchronization, advanced filtering, and Kubernetes-based deployment automation across environments.
