Sahaj Bhadja

(213) 284-4651 sahaj.bhadja@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years delivering **full-stack products**, **APIs**, cloud services, data workflows, and AI-assisted features with strong testing, observability, security, and production ownership.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Web Technologies, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Delivered well-scoped product changes by translating stakeholder workflows into **FastAPI-based LLM orchestration** with explicit job states, failure isolation, and monitoring, processing 1K+ AI jobs at 3x throughput.
- Built multi-tenant data and integration pipelines across Azure SQL, PostgreSQL, SQL Server, and cloud storage, processing 5K+ monthly jobs with **validation, reconciliation, CI/CD, and 99%+ reliability** across production environments.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Built **customer-facing React and Flask features** for uploads, rubrics, grading, and feedback, supporting 150+ instructors and 10K+ daily requests while reducing turnaround time 60% through production workflows.
- Implemented secure file ingestion, concurrent processing, REST APIs, model routing, and OCR fallbacks, then supported releases through **automated testing, CI/CD, monitoring, and production issue investigation** for reliable operations.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer - (SecureSync) *India*

- Translated partner requirements into object-oriented microservices and large-scale API integrations, improving response times 30% while collaborating with Microsoft and GitHub teams through **design discussions, reviews, and Agile delivery**.
- Automated **testing, release, and incident evidence** with 20+ PyTest and Mockito suites, Jenkins pipelines, VM builds, and cross-platform validation, increasing pipeline efficiency 68% and reducing technical debt 20%.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern - (VibrantChem) *India*

- Built eight modular microservices for authentication, permissions, resources, billing, and notifications, using **REST APIs and event-driven WebSockets** to synchronize 2M+ records across distributed locations through secure services.
- Developed React and TypeScript interfaces with real-time dashboards, then supported production releases through Docker staging, Jenkins CI/CD, Sentry monitoring, and **documented operational troubleshooting** across eight customer-facing services.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Translated client requirements into **technical specifications and reusable architecture** for 12+ integrations, mapping booking, payment, coupon, and real-time status workflows before implementation to reduce design errors 25%.
- Built React and Flask booking features with Firebase, REST APIs, WebSockets, payments, and cross-platform delivery, supporting 50K+ records with **sub-200-millisecond API responses** during customer demonstrations and reviews.

Skills

Languages: Python, TypeScript, JavaScript, Java, SQL, C++
Product Engineering: React, Next.js, FastAPI, Flask, Node.js, REST APIs, Microservices, WebSockets, Responsive Design, Authentication, Authorization
Data & AI: PostgreSQL, SQL Server, MySQL, MongoDB, Redis, Data Modeling, ETL, Event-Driven Systems, LLM APIs, RAG, PyTorch, Embeddings
Cloud & Operations: Azure, AWS, GCP, Docker, Kubernetes, CI/CD, Jenkins, GitHub Actions, Monitoring, Logging, Sentry, Kibana
Quality & Delivery: Git, Agile, Jira, Unit Testing, Integration Testing, Code Reviews, Debugging, Incident Investigation, Observability, Security, Documentation, Requirements Analysis, Stakeholder Collaboration

Projects

PropertyFlow | *TypeScript, React, Node.js, PostgreSQL, Redis, REST APIs, Docker*

- Designed a **connected property operations platform** combining reservations, digital agreements, recurring billing, access events, tenant communications, and portfolio dashboards through secure APIs, relational workflows, and role-based administrative interfaces.

Incident Desk | *Python, FastAPI, PostgreSQL, Event Streaming, Monitoring, GitHub Actions*

- Built an **operational reliability toolkit** that correlates service events, API failures, deployment changes, and customer reports, producing structured incident timelines, durable remediation tasks, regression tests, and searchable runbooks.

FinNexus | *Next.js, TypeScript, MongoDB, Plaid, WebSockets, Kubernetes* | Live

- Built a **secure full-stack financial platform** supporting 50,000+ users and 1M+ transactions with Plaid bank linking, token-based protection, real-time WebSocket updates, responsive interfaces, and Kubernetes deployment automation.
