Sahaj Bhadja

(213) 284-4651 sahaj.bhadja@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack Developer with 2+ years building customer-facing **React** and **Node.js** web apps with RESTful APIs, PostgreSQL and **Firestore**, event-driven webhook integrations, CI/CD, automated testing, and production troubleshooting.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Designed normalized **PostgreSQL** schemas with indexing and query tuning for 200+ users and 10K+ records, cutting latency 35%, and enforced row-level isolation across a 500+ user platform.
- Built backend services and integration pipelines with reconciliation checks and **CI/CD**-backed releases at 99%+ reliability, performing root-cause analysis on failures across 5K+ monthly production jobs for 500+ users.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Built a customer-facing **React** application with REST APIs and MySQL on AWS, deployed through GitHub Actions CI/CD to Vercel and Render, serving 150+ instructors and 10K+ daily requests.
- **Troubleshot** production OCR timeouts and model failures across third-party AI APIs, adding fallback routing and timeout handling that kept APIs stable at peak load and cut feedback turnaround 60%.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Wrote 20+ automated unit and **integration test** suites with PyTest and Mockito, run nightly in Jenkins across Windows, Linux, and macOS with coverage reports, in **Agile Scrum** sprints.
- Optimized large-scale third-party API integrations with pagination, field filtering, and caching, improving response times 30% for low-bandwidth users and cutting technical debt 20% through object-oriented refactoring of shared modules.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built a **React and Node.js** Express platform with RESTful microservices, JWT authentication, and real-time WebSocket updates, syncing 2M+ records across locations for resource, billing, and lead workflows.
- Automated Jenkins **CI/CD** with Jest and Selenium end-to-end tests, Docker packaging, and approval-gated staging and production releases, cutting deployment time 50% and reaching 95%+ successful build validation across release runs.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built booking APIs on **Firebase Firestore** with real-time sync and Cloud Messaging triggers for React Native and React TypeScript clients, speeding booking confirmations 40% across 50K+ records.
- Integrated **third-party** payment providers through idempotent **webhooks** that drove event-based refund, dispute, and status updates, cutting manual refund handling about 70% across cards, wallets, and PayPal for 50K+ bookings.

Skills

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS, Java
Frontend: React, Next.js, React Native, TailwindCSS, Responsive Design, Agile/Scrum, Git, Kubernetes
Backend: Node.js, Express.js, REST APIs, Microservices, Webhooks, WebSockets, JWT
Data & Cloud: PostgreSQL, Firestore, Firebase, MongoDB, MySQL, NoSQL, GCP, AWS, Docker
Quality & Delivery: Jest, Selenium, PyTest, Integration Testing, CI/CD, GitHub Actions, Jenkins, Code Reviews, Root Cause Analysis

Projects

Policy Quote Web App | *React, Node.js, Cloud SQL, Cloud Run, Playwright, GitHub Actions*

- Designed an **accessible** React and Node.js quote flow on **Cloud Run** with Cloud SQL storage, a multi-environment CI/CD pipeline, and Playwright tests covering keyboard and screen-reader paths.

Claims Event Pipeline | *Node.js, Kafka, Firestore, Webhooks, GCP*

- Designed a **Kafka**-based Node.js service that consumes claim status events, updates Firestore records, sends partner webhooks with retries, and replays failed events from a dead-letter topic for **root-cause analysis**.

HMIS – Hospital Management Information System Live | *MERN, TypeScript, ABDM APIs, Twilio, Sentry*

- Won Smart India Hackathon with a **MERN** and TypeScript platform integrating third-party ABDM health APIs and Twilio alerts, with Sentry monitoring, reducing hospital administrative workload 30% across 100+ daily appointments.
