Sahaj Bhadja

(213) 284-4651 sahaj.bhadja@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Engineer with 2+ years maintaining business software and data, running **validation testing** before releases, **debugging** custom tools, managing structured pricing and business data in SQL, and supporting customers and cross-functional teams on technical questions.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Analysis of Algorithms, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Data Retrieval, Object-Oriented Programming, Operating Systems

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Maintained **data accuracy** across recurring monthly integration jobs with incremental loads, reconciliation checks, and validation, sustaining 99%+ reliability over 5K+ jobs through CI/CD-backed releases for 500+ platform users.
- Structured 10K+ records in normalized SQL schemas for 200+ users, tuning queries to cut latency 35% and dashboard load time from 1.2s to 350ms for platform users.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Supported 150+ instructors using a grading platform, investigating **reported problems** such as OCR timeouts and model failures, then shipping fallback fixes that kept 10K+ daily requests stable at peak load.
- Measured grading output across 10K+ handwritten and text submissions, holding 90%+ grading consistency while automated rubric generation and grading cut instructor feedback turnaround 60% for 150+ instructors.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Ran nightly **release testing** that built, installed, and verified software on Windows, Linux, and macOS with 20+ automated suites, and tracked results through CSV reports and failure logs.
- Took requirements through deployment with Microsoft and GitHub stakeholders in Agile sprints, **debugging** API issues to improve response times 30% and cutting manual data entry 35% for business teams.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built a resource-management platform covering customer records, invoices, **billing**, and leads, modeling Azure SQL tables for resources, allocations, usage stats, and performance reports across multiple business locations.
- Used Google Analytics on feature usage, load times, and drop-off points to guide product fixes, cutting resource wastage 42% and lifting lead conversions 15% through tested releases.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built **pricing** and coupon logic that recalculated totals with eligibility, expiry, and service rules for a booking platform, keeping booking responses under 200ms across 50K+ records for customers.
- Gathered requirements with the client, mapped 12+ integration points, and **presented the system design** before implementation, cutting design errors 25% through Figma flows and design reviews with the client.

Skills

Languages & Data: SQL, Python, Java, JavaScript, PostgreSQL, SQL Server, Azure SQL, MySQL, Stakeholder Communication
Data Maintenance: Data Validation, Data Modeling, Reconciliation, ETL Pipelines, Reporting, Tableau, Google Analytics
Testing & Support: Validation Testing, Release Testing, Test Automation, PyTest, Debugging, Troubleshooting, Root Cause Analysis
Tools: Git, Jenkins, CI/CD, REST APIs, Figma, Linux, Windows, Postman, Unit Testing, Integration Testing, Docker, AWS
Professional: Customer Support, Requirements Gathering, Documentation, Agile, Cross-Functional Collaboration

Projects

HVAC Equipment Selection Validator | *Python, SQL, pytest*

- Designed a **validation** tool that runs air handler selection cases monthly against expected airflow, coil, and pricing outputs, and flags any **option data** that changed between releases.

Product Option Data Manager | *Python, SQL Server, Excel, Flask*

- Designed a small app for entering new **product options** and line extensions with rule checks for incompatible combinations, so selection and **ordering** data stays consistent across tools.

Chat2SQL Code | *Java, TypeScript, SQL, SQL Server, Docker*

- Extended a database workspace supporting 10+ engines with schema exploration, **structure synchronization**, a query console, and AI-assisted reporting dashboards, with generated SQL reaching 82% accuracy across Windows, macOS, and Linux.
