Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahaj-bhadja sahaj-bhadja

Summary

Software engineer with 2+ years building scalable APIs, SQL-backed services, and user-facing web applications. Strong in Python, JavaScript/TypeScript, object-oriented programming, testing, and shipping reliable product features.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed responsive React interfaces and Flask APIs for an AI grading product handling 10,000+ daily requests, integrating uploads, grading history, and secure file-processing workflows for educational web applications.
- Connected multimodal services to backend endpoints, added concurrent batch processing, and supported CI/CD-backed releases that reduced feedback turnaround by 60% while keeping API behavior stable across high-volume operations.
- Worked across frontend state, backend logic, and testing workflows to deliver polished user-facing features quickly, participating in fast-release cycles, debugging issues early, and applying feedback through collaborative development practices.

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Maintained SQL-backed platform services for 500+ users, tuning indexed queries, background workers, and validation flows across FastAPI workflows to improve dashboard latency from 1.2 seconds to 350 milliseconds.
- Supported recurring integration updates, data fixes, and release workflows, translating stakeholder requests into maintainable backend changes while documenting debugging paths that made production issues faster to isolate and resolve.
- Worked across application, data, and storage layers, supporting operational visibility and stable platform behavior while balancing multiple requests, backend enhancements, and production support tasks at once daily.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered API and ETL integrations using Python, SQL, AWS Glue, and S3, improving response time by 30% while supporting scalable service integrations, data collection workflows, and maintainable backend components.
- Maintained 20+ automated tests and CI pipelines with Jenkins, PyTest, and Mockito, increasing release reliability by 68% and strengthening debugging discipline across validation checks, deployments, and multi-environment builds.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built MERN platform features with REST APIs, WebSockets, and responsive interfaces, supporting synchronized records across modular workflows while translating business requirements into reliable end-to-end production application functionality.
- Automated Docker-based build and test flows with Jenkins, cutting release time by 50% and improving deployment consistency, troubleshooting discipline, and shared development practices across distributed product environments.

Skills

Languages: Python, JavaScript, TypeScript, SQL, Java, C++, Bash
Frontend: React, Next.js, HTML, CSS, TailwindCSS, responsive design, UI state
Backend & APIs: Flask, FastAPI, Node.js, Express, REST APIs, WebSockets, JSON
Data & Infra: PostgreSQL, MySQL, MongoDB, SQL Server, Azure SQL, AWS, Azure, Docker, Jenkins, GitHub Actions, CI/CD
Engineering: data structures, algorithms, object-oriented programming, unit testing, debugging, code reviews, Agile/Scrum, scalability

Projects

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB, Plaid*
- Built a real-time fintech platform supporting 50,000+ users and 1M+ transactions, combining secure APIs, live synchronization, and scalable infrastructure for high-volume data access and operational visibility.

PiXMod Live | *Next.js, MongoDB, Stripe, CLIP, SAM*
- Built a responsive SaaS image platform with Next.js, MongoDB, and Stripe, supporting scalable user workflows, premium billing, and polished web interfaces while increasing premium conversion by 18%.

HMIS Live | *MERN, TypeScript, ABDM APIs, Twilio, Sentry*
- Built a healthcare workflow platform with TypeScript, MERN, ABDM APIs, Twilio alerts, and Sentry monitoring, reducing administrative workload by 30% through responsive scheduling, consent-aware access, and operational dashboards.
