Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahaj-bhadja sahaj-bhadja

Summary

Software engineer with 2+ years building responsive web apps, REST APIs, SQL-backed services, and AI workflows. Strong in JavaScript/TypeScript, React, Python, Flask/FastAPI, testing, CI/CD, and Agile delivery.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Maintained SQL-backed services for 500+ users, tuning indexed queries, background workers, and validation flows across FastAPI workflows to improve dashboard latency from 1.2 seconds to 350 milliseconds.
- Built backend release workflows with reconciliation checks, data fixes, and CI/CD-backed deployments, helping teammates ship maintainable feature updates while keeping recurring portal operations reliable across production support cycles.
- Supported cross-functional requests from stakeholders, translating user-facing needs into API and data-layer updates while documenting practical debugging paths that made platform behavior easier to troubleshoot and maintain.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed responsive React interfaces and Flask APIs for an AI grading product handling 10,000+ daily requests, integrating uploads, grading history, and secure file-processing workflows for educational applications.
- Connected multimodal LLM and OCR services to backend endpoints, added concurrent batch processing, and supported CI/CD-backed releases that reduced feedback turnaround by 60% while keeping API behavior stable.
- Worked across frontend state, backend logic, and testing workflows to deliver polished user-facing features quickly, participating in fast-release cycles, debugging issues early, and applying feedback through collaborative development practices.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered API and ETL integrations using Python, SQL, AWS Glue, and S3, improving response time by 30% while supporting scalable service integrations, data collection workflows, and maintainable backend components.
- Maintained 20+ automated tests and CI pipelines with Jenkins, PyTest, and Mockito, increasing release reliability by 68% and strengthening debugging discipline across validation checks, deployments, and multi-environment builds.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built MERN platform features with REST APIs, WebSockets, and responsive interfaces, supporting synchronized records across modular product workflows while translating business requirements into reliable end-to-end web functionality.
- Automated Docker-based build and test flows with Jenkins, cutting release time by 50% and improving deployment consistency, shared documentation, and troubleshooting practices across distributed project environments and development teams.

Skills

Languages: Python, JavaScript, TypeScript, SQL, Java, C++, Bash
Frontend: React, Next.js, HTML5, CSS3, TailwindCSS, responsive design, component design, polished layouts
Backend & APIs: Flask, FastAPI, Node.js, Express, REST APIs, WebSockets, background workers, JSON, API integration
Data & Databases: PostgreSQL, MySQL, MongoDB, SQL Server, Azure SQL, data modeling, query tuning, SOLR, Lucene
Cloud & Delivery: AWS, Azure, Docker, Jenkins, Git, GitHub Actions, CI/CD, unit testing, code reviews, debugging, Agile, Scrum, Kanban

Projects

HMIS Live | *MERN, TypeScript, ABDM APIs, Twilio, Sentry*
- Built a healthcare workflow platform with TypeScript, MERN, ABDM APIs, Twilio alerts, and Sentry monitoring, reducing administrative workload by 30% through responsive scheduling, consent-aware access, and operational dashboards.

PiXMod Live | *Next.js, MongoDB, Stripe, CLIP, SAM*
- Built a responsive SaaS image platform with Next.js, MongoDB, and Stripe, supporting scalable user workflows, premium billing, and polished web interfaces while increasing premium conversion by 18%.

Chat2SQL Code | *Java, TypeScript, SQL, Docker, Maven*
- Built an AI-powered SQL workspace across Java and TypeScript services, supporting 10+ databases and accelerating query authoring, schema exploration, and validation through a unified developer interface and local workflows.
