Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Associate software engineer with 2+ years building **Java/Python data systems**, **SQL-optimized transformation pipelines**, and **API-driven analytics solutions** in fast-paced Agile teams across distributed stakeholders.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 - Present*
- Built **data transformation services** and interfaces for 500+ users, reducing query latency from **1.2s to 350ms** through SQL tuning and backend optimization.
- Implemented **production validation workflows** for 5K+ monthly jobs, improving completeness, accuracy, and rollout confidence for analytics-critical applications.

Grad8 **LA, California**
Software Engineer Intern *June 2025 - August 2025*
- Developed **full-stack Java/Python-adjacent features** handling 10K+ daily requests, translating business requirements into testable APIs and maintainable web components.
- Improved **CI/CD and defect triage** with automated checks, reducing release turnaround by **60%** while maintaining quality across iterative product changes.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 - May 2025*
- Built **large-scale analytics pipelines** over 100K+ records, enabling reproducible data interpretation and statistically grounded performance reporting for stakeholders.
- Documented **technical features and operational behavior** before releases, improving team knowledge sharing and production readiness across collaborators.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 - July 2024*
- Engineered **Java/Python backend workflows** with AWS Glue and S3, improving response time by **30%** and supporting reliable, high-volume data operations.
- Maintained **20+ automated test suites** using Jenkins, PyTest, and Mockito, boosting pipeline efficiency by **68%** and reducing production regressions.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 - August 2023*
- Developed **MERN + WebSocket modules** supporting eight workflows and 2M+ synchronized records, improving data consistency and user-facing operational throughput.
- Automated **containerized deployment/testing** via Docker and Jenkins, reducing release time by **50%** and improving predictability of production rollouts.

Skills

Languages: **Java**, **Python**, SQL, JavaScript/TypeScript, C++, Bash
Data & DB: relational database design, query optimization, stored procedure tuning, transformation pipelines
APIs & Services: Spring Boot/Flask-style web services, REST endpoints, distributed integration patterns
Engineering Process: Agile/SAFe familiarity, peer code reviews, requirement validation, technical documentation
Tooling: Git/GitHub, Jenkins, Docker, CI/CD, cross-team collaboration (onshore/offshore)

Projects

Claims Audit Transformation Engine | *Java, Spring Boot, SQL Server, Python*
- Built a **data transformation and analytics service** for audit workflows with optimized SQL and rules validation, improving processing accuracy and reviewer turnaround times.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*
- Developed a **schema-aware query assistant** across 10+ datasets with validation and explainable outputs, reducing manual debugging and accelerating analyst productivity.

Linguistix Code | *Python, AWS, Docker, CI/CD*
- Implemented a **containerized REST pipeline** with automated CI/CD checks, improving production reliability and continuity for large-scale data processing workloads.
