Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | LinkedIn | GitHub | Portfolio

Summary

Frontend engineer with 2+ years building data-rich **React**, **TypeScript**, and JavaScript applications. Experienced in dashboards, controlled workflows, multi-tenant access, REST/JSON integration, component testing, edge-case handling, and production delivery.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Software Engineering, Database Systems, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Operating Systems, OOP, Software Engineering, Data Structures and Algorithms

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built data-rich **React** dashboards for 500+ users with multi-tenant access controls, optimized queries, loading feedback, and responsive states, reducing end-to-end dashboard latency from 1.2 seconds to 350 milliseconds.
- Integrated frontend workflows with typed data models and REST services, implementing validation, error isolation, status visibility, and recovery paths while supporting concurrent AI processing and reliable user feedback.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Designed and shipped **React** interfaces for file upload, AI model selection, grading history, and result investigation, supporting 150+ users and 10,000+ daily requests through responsive production workflows.
- Implemented controlled forms, validation feedback, loading indicators, empty states, error recovery, and progress monitoring for 1,000+ file batches, reducing turnaround 60% while preserving clarity during complex AI processing.

Aasma Technology Solutions **India**
Software Developer Engineer – SecureSync *August 2023 – July 2024*
- Delivered cross-platform application improvements across Windows, Linux, and macOS, collaborating through code reviews and maintaining 20+ automated unit and integration suites to protect behavior and release quality.
- Refined REST payloads, pagination, caching, and data filtering for high-volume interfaces, improving response times 30% while reducing technical debt 20% through reusable and maintainable implementation patterns across platforms.

Aasma Technology Solutions **India**
Full Stack Developer Intern – VibrantChem *May 2023 – August 2023*
- Developed reusable **React** and TypeScript components across eight product modules, integrating WebSockets and REST APIs to present more than two million synchronized records through responsive real-time workflows.
- Maintained component and end-to-end testing with Jest, Mocha, Selenium, Sentry, Docker, and Jenkins, cutting release time 50% while improving design consistency, regression protection, and production feedback across staged environments.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Translated **Figma** concepts into React Native and web interfaces spanning authentication, booking, payment, and status workflows, mapping 12+ API integration points before presenting interaction behavior to stakeholders.
- Built responsive interfaces with React, TypeScript, Flask, and Firebase, supporting 50,000+ records, real-time synchronization, and sub-200-millisecond interactions while improving mobile and web compatibility by 15% across platforms.

Skills

Frontend: React.js, TypeScript, JavaScript, HTML, CSS, Next.js, Material UI, Tailwind CSS, components, hooks, state management, controlled forms
Interfaces & Data: REST APIs, HTTP, JSON, WebSockets, filterable tables, dashboards, data visualization, validation states, loading states, empty states, error states
Security & Access: Authentication, role-based access, multi-tenant applications, secure file ingestion, access controls, usage tracking, LLM systems, AI model integration
Testing & Delivery: Git, Jest, Mocha, Selenium, unit testing, integration testing, UI testing, Sentry, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD
Design & Practices: Figma, responsive design, component architecture, design consistency, visual hierarchy, performance optimization, code reviews, Agile collaboration

Projects

HMIS | Live | *React, TypeScript, Role-Based Access, Sentry*
- Built a role-based management console with scheduling, controlled workflows, dashboards, notifications, validation, and Sentry monitoring, reducing administrative workload 30% while supporting secure access and operational visibility for users.

FinNexus | Live | *Next.js, TypeScript, Tailwind CSS, WebSockets*
- Created a data-dense fintech console for 50,000+ users and one million transactions, integrating authentication, real-time updates, advanced filtering, monitoring, and clear information hierarchy across sensitive financial workflows.

Trend Tracker | Live | *React, Material UI, Responsive Commerce, AWS*
- Built a responsive React and Material UI commerce experience serving three million users, integrating visual recommendations and streamlined product discovery while improving recommendation accuracy from 78% to 92%.
