Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | LinkedIn | GitHub | Portfolio

Summary

Software engineer with 2+ years building workflow automation, dashboards, and data-driven applications using **React**, **TypeScript**, Python, SQL, and Azure. Experienced translating business requirements into validated, documented, and maintainable digital solutions.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Software Engineering, Database Systems, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Operating Systems, OOP, Software Engineering, Data Structures and Algorithms

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built **React** dashboards and automated data workflows for 500+ users using Azure SQL and Blob Storage, implementing role-based permissions, validation, and indexed queries that reduced latency from 1.2 seconds to 350 milliseconds.
- Translated operational requirements into documented application workflows processing 5,000+ monthly jobs, adding reconciliation checks, error handling, status visibility, and repeatable recovery to maintain greater than 99% production reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Designed and shipped **React** forms, reporting views, file collection, and approval-style grading workflows for 150+ users, supporting 10,000+ daily requests through accessible interfaces and reliable Python services.
- Automated batch processing for 1,000+ files with validation, progress notifications, fault recovery, and user-visible status reporting, reducing manual turnaround 60% while preserving data quality across complex operational workflows.

Aasma Technology Solutions **India**
Software Developer Engineer – SecureSync *August 2023 – July 2024*
- Automated cross-platform build, installation, testing, and reporting workflows across Windows, Linux, and macOS, maintaining 20+ unit and integration suites while collaborating with Microsoft and GitHub stakeholders in Agile sprints.
- Developed data-integration workflows using Python, SQL, AWS Glue, S3, REST APIs, and validation controls, improving response times 30% and pipeline efficiency 68% while reducing repetitive manual processing.

Aasma Technology Solutions **India**
Full Stack Developer Intern – VibrantChem *May 2023 – August 2023*
- Developed **React**, TypeScript, and Node.js applications across eight business modules, digitizing resource, billing, lead, notification, and reporting workflows while synchronizing more than two million records through REST APIs.
- Modeled operational data in Azure SQL and automated testing and deployment with Jest, Selenium, Docker, Jenkins, and Sentry, cutting release time 50% while improving traceability and production support.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Gathered client requirements and documented an end-to-end service workflow spanning authentication, booking, payment, notifications, and reporting, mapping 12+ integration points before presenting the proposed architecture to stakeholders.
- Built responsive React, TypeScript, Flask, and Firebase applications supporting 50,000+ records, real-time status updates, automated refund handling, and sub-200-millisecond interactions across mobile and web operational workflows.

Skills

Applications: React.js, TypeScript, JavaScript, Python, Node.js, HTML, CSS, forms, dashboards, responsive interfaces, REST APIs, JSON
Data & Microsoft: SQL, Azure SQL, SQL Server, PostgreSQL, MySQL, MongoDB, Microsoft Azure, Blob Storage, Excel data integration, data modeling, validation, cleansing
Automation & Reporting: Workflow automation, data collection, approvals, notifications, operational reporting, data visualization, business process analysis, process improvement
Testing & Delivery: Git, Jest, Selenium, PyTest, unit testing, integration testing, UAT support, troubleshooting, Docker, Jenkins, GitHub Actions, CI/CD
Collaboration: Requirements gathering, stakeholder communication, technical documentation, user guides, Agile/Scrum, design reviews, production support, role-based access

Projects

HMIS | Live | *React, TypeScript, Role-Based Access, Sentry*
- Built a role-based management console with scheduling, controlled workflows, dashboards, notifications, validation, and Sentry monitoring, reducing administrative workload 30% while supporting secure access and operational visibility for users.

Chat2SQL | Code | *Java, TypeScript, SQL, Docker*
- Built a database workspace supporting 10+ SQL platforms with schema exploration, query generation, validation, and export workflows, helping users transform structured data requests into reliable and reusable database operations.

FinNexus | Live | *Next.js, TypeScript, Dashboards, WebSockets*
- Created an operational finance dashboard for 50,000+ users and one million transactions, integrating secure access, real-time updates, advanced filtering, notifications, and reporting views across sensitive data workflows.
