Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | LinkedIn | GitHub | Portfolio

Summary

Application developer with 2+ years building business applications, workflow automations, data pipelines, and system integrations. Experienced in **Python**, **SQL**, REST APIs, process improvement, product ownership, Agile delivery, and technical documentation.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Software Engineering, Database Systems, Web Technologies, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Operating Systems, OOP, Software Engineering, Data Structures and Algorithms

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Owned multi-tenant **Python** and Azure SQL application workflows for 500+ users, translating operational requirements into normalized data models, access controls, and optimized dashboards that reduced latency from 1.2 seconds to 350 milliseconds.
- Built automated data-integration workflows processing 5,000+ monthly jobs with incremental loads, reconciliation checks, monitoring, recovery, and CI/CD-backed releases, achieving 99%+ reliability while reducing recurring operational intervention across teams.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed end-to-end business workflows with React, Python Flask, MySQL, and REST APIs for 150+ users, automating file intake, evaluation, status tracking, and feedback across 10,000+ daily requests.
- Iterated on application features using stakeholder feedback, validation rules, progress monitoring, and recovery states for 1,000+ file batches, reducing turnaround 60% while improving usability and operational transparency.

Aasma Technology Solutions **India**
Software Developer Engineer – SecureSync *August 2023 – July 2024*
- Delivered enterprise integration software from requirements through deployment, maintaining 20+ unit and integration test suites across Windows, Linux, and macOS while collaborating with stakeholders through Agile sprint cycles.
- Automated ETL and data-exchange workflows using AWS Glue, S3, SQL, caching, and pagination, improving response times 30%, processing efficiency 68%, and maintainability across connected enterprise platforms with reliable operations.

Aasma Technology Solutions **India**
Full Stack Developer Intern – VibrantChem *May 2023 – August 2023*
- Designed and maintained eight modular business services for authentication, resource allocation, customer management, billing, permissions, and notifications, integrating REST APIs and WebSockets across more than two million records.
- Automated application testing, staged releases, and production monitoring with Jenkins, Docker, Selenium, Sentry, and Azure, cutting deployment time 50% while strengthening reliability and continuous product iteration across environments.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Worked directly with business stakeholders to map 12+ integration points and translate booking, payment, pricing, and status requirements into technical workflows before implementation and iterative client review.
- Automated cross-platform operational workflows using React, TypeScript, Flask, Firebase, and webhooks across 50,000+ records, reducing manual payment handling 70%, maintaining sub-200-millisecond responses, and improving compatibility 15%.

Skills

Application Development: Python, SQL, JavaScript, TypeScript, React.js, Flask, FastAPI, Node.js, REST APIs, JSON, WebSockets, scripting
Data & Integration: PostgreSQL, MySQL, MongoDB, Azure SQL, AWS Glue, S3, ETL, data migration, data modeling, validation, reconciliation, system integration
Automation & AI: Workflow automation, process improvement, LLM APIs, AI applications, background jobs, event-driven workflows, monitoring, error handling
Delivery & Quality: Git, Agile, Scrum, SDLC, Jira, CI/CD, Docker, Jenkins, unit testing, integration testing, troubleshooting, release management, code reviews
Product Ownership: Requirements gathering, stakeholder communication, feature planning, iterative delivery, prototyping, adoption support, technical documentation, operational handoffs

Projects

Chat2SQL | Code | *Java, TypeScript, SQL, Docker, Data Integration*
- Built a database application supporting 10+ systems with schema inspection, SQL generation, query validation, metadata exploration, and documented Docker deployment, streamlining data access and repeatable integration workflows.

HMIS | Live | *Business Workflows, TypeScript, REST APIs, Sentry*
- Built an operational workflow application with role-based access, scheduling, notifications, dashboards, and Sentry monitoring, reducing administrative workload 30% through validated functionality, documented implementation processes, and support workflows.

Big-Brain | Live | *LLM APIs, PostgreSQL, REST APIs, Workflow Automation*
- Built an AI-assisted document workflow processing 50,000+ records with secure access, summarization, search, incremental indexing, and collaborative updates, reducing manual review time 60% through intelligent automation at scale.
