Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack engineer with 2+ years building **Node.js/TypeScript APIs**, **React interfaces**, and **authentication microservices** with JWT, role-based access control, and secure session handling across production applications.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **JWT-based authentication microservice** with role-based access control across 4 permission tiers, implementing secure session handling, token validation, and user management for 2M+ synchronized records.
- Developed **MERN-based platform with 8 microservices** including user registration, profile management, and notification services, using React frontend with WebSocket-powered real-time updates and REST APIs.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **full-stack authentication workflows** using Flask-Login and React, implementing secure user sessions, file upload validation, and access control for 150+ instructors across role-based grading workflows.
- Built **modular REST APIs with Blueprint architecture** handling 10K+ daily requests, implementing secure endpoints, input validation, and error handling while maintaining stable response under concurrent load.

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Architected **multi-tenant platform with row-level security** on Azure SQL, implementing data isolation, access controls, and secure API patterns for 500+ users while reducing dashboard latency by **70%**.
- Built **ETL pipelines with validation and error handling** processing 5K+ monthly jobs, implementing automated checks, secure data flows, and CI/CD-backed releases achieving 99%+ production reliability.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Implemented **JWT and wallet-signature authentication** for cross-platform booking application, supporting passwordless login patterns and secure session management across 50K+ user transactions.
- Built **Flask APIs with secure payment integration** including webhook handling, token validation, and CORS configuration, achieving sub-200ms response times while processing booking and payment flows.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Maintained **20+ automated test suites** using Jest, PyTest, and Mockito, implementing unit and integration testing across authentication flows and API endpoints, increasing CI reliability by **68%**.
- Engineered **CI/CD pipelines with Jenkins and GitHub Actions** for cross-platform deployment, automating build validation, test execution, and staged releases across Windows, Linux, and macOS environments.

Skills

Languages: **JavaScript**, **TypeScript**, Python, SQL, Java, HTML/CSS
Frontend: React, Next.js, React Router, responsive UI, accessibility-aware components
Backend: Node.js, Express, NestJS basics, Flask, REST APIs, microservices architecture
Auth & Security: JWT, OAuth 2.0 basics, session management, CORS, secure cookies, RBAC
Testing & CI/CD: Jest, React Testing Library, Cypress basics, Postman, GitHub Actions, Jenkins
Cloud & Tools: AWS, Azure, Docker, Git, Linux, Terraform basics

Projects

FinNexus Live | *Next.js, TypeScript, Plaid, MongoDB, WebSockets*

- Built a **secure fintech platform** with token-based authentication and Plaid bank linking, implementing firewall-protected APIs, real-time transaction sync, and secure session handling for 50K+ users.

HMIS Live | *MERN, TypeScript, ABDM APIs, Twilio, Sentry*

- Built a **healthcare platform with consent-based authentication** using ABDM APIs, implementing role-based access control across patient, doctor, and admin workflows with secure data retrieval.

PiXMod Live | *Next.js, MongoDB, Stripe, Clerk*

- Built an **AI-powered SaaS with user authentication** using Clerk, implementing subscription billing with Stripe, secure file uploads, and user profile management with MongoDB-backed sessions.
