Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer with 2+ years building **API integrations**, **internal tools and dashboards**, and **data pipelines**, with strong cross-functional collaboration skills and experience translating business needs into scalable technical solutions.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **internal platform services and dashboards** for 500+ users, reducing request latency from **1.2s to 350ms** by optimizing SQL queries, tuning access patterns, and providing visibility into platform usage and analytics.
- Implemented **automated validation and monitoring pipelines** for 5,000+ monthly jobs, reducing downstream failures through proactive issue detection, log analysis, and timely resolution of data-quality regressions.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **full-stack features and REST APIs** handling 10,000+ daily requests, translating business requirements into maintainable backend services and responsive interfaces while providing technical support during rollout.
- Built **AI-assisted workflows** with multimodal models, troubleshooting integration challenges and ensuring timely resolution while supporting 150+ instructors with post-implementation guidance and issue tracking.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Built **large-scale data pipelines** across 100,000+ records, enabling reproducible evaluation and providing dashboards for experiment tracking while digesting complex technical documentation for model architectures.
- Produced **technical reports and specifications** translating findings into actionable guidance, improving cross-functional alignment between research and engineering teams through clear documentation and demos.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered **API integrations and ETL microservices** using AWS Glue and S3, improving response time by **30%** while guiding partners through implementation best practices and troubleshooting integration issues.
- Maintained **20+ automated test suites** using Jenkins, PyTest, and Mockito, increasing CI reliability by **68%** and working with engineering teams to define, test, and roll out new features to the platform.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Developed **CRM platform with real-time integrations** using MERN stack and WebSockets, syncing 2M+ records across locations with RESTful APIs, JSON payloads, and partner-facing data synchronization workflows.
- Built **internal monitoring tools and dashboards** with Jenkins, providing visibility into deployment health, build status, and system metrics while cutting release time by **50%** through automation.

Skills

Languages: **JavaScript**, **Java**, **Python**, **SQL**, TypeScript, C++, Bash
APIs & Data: REST APIs, **JSON**, XML, Postman, ETL pipelines, data integration
Databases: **PostgreSQL**, **MySQL**, MongoDB, Firebase, query optimization, RDS
Tools & Platforms: AWS (S3, Glue, RDS, EC2), Docker, Jenkins, Git/GitHub, CI/CD
Frontend: React, Next.js, component-driven interfaces, dashboards, responsive UI

Projects

Chat2SQL Code | *Java, TypeScript, SQL, Docker, PostgreSQL, MySQL*

- Built an **AI-powered SQL workspace** supporting 10+ database systems (PostgreSQL, MySQL, SQLite, MongoDB), accelerating query authoring and schema exploration with cross-platform Java and TypeScript integration.

FinNexus Live | *Next.js, TypeScript, Plaid API, MongoDB, WebSockets*

- Built a **fintech platform with third-party API integration** (Plaid), supporting 50,000+ users and 1M+ transactions with real-time dashboards, transaction filtering, and seamless partner data synchronization.

HMIS Live | *MERN, ABDM APIs, Sentry, Twilio, TypeScript*

- Built a **healthcare platform integrating ABDM APIs**, supporting 100+ daily appointment workflows with consent-based data access, Sentry monitoring, and Twilio notifications for partner success.
