Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack software engineer with 2+ years building **customer-facing web applications**, backend APIs, SQL/NoSQL workflows, automated tests, and production support tooling across JavaScript, Python, React, Node.js, Git, and AI-assisted development.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Maintained **SQL-backed web workflows** for 500+ users, translating stakeholder issues into API updates, validation jobs, release tasks, and documentation for production support.
- Improved **application performance and reliability** by tuning indexed queries, background jobs, and CI/CD releases, reducing dashboard latency from **1.2s to 350ms** while strengthening troubleshooting handoffs.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed **React and Flask product features** handling 10,000+ daily requests, integrating REST APIs, file uploads, OCR, and AI services into customer-facing workflows.
- Triaged **user-facing bugs across listings-style workflows** including persistence, ingestion, and rendering issues, documenting root causes and reducing feedback turnaround by **60%**.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*
- Built **Python evaluation pipelines** across 100,000+ records, producing structured metrics, logs, and visual summaries for model analysis, quality checks, and debugging.
- Documented **prompt, reporting, and troubleshooting workflows** for researchers, turning ad hoc experiments into repeatable processes with clearer technical handoffs and traceable outputs.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered **API and ETL microservices** using Python, SQL, AWS Glue, and S3, improving response time by **30%** while supporting scalable integrations.
- Maintained **20+ automated test suites** using Jenkins, PyTest, and Mockito, increasing CI reliability by **68%**, reducing regressions, and improving release confidence.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built **MERN platform features** with REST APIs, WebSockets, and responsive interfaces, supporting 2M+ synchronized records across modular product and user workflows.
- Automated **Docker-based build and test flows** with Jenkins, cutting release time by **50%** and improving deployment consistency, troubleshooting, and documentation.

Skills

Languages: JavaScript, TypeScript, Python, SQL, Java, Go familiarity, PHP familiarity, HTML5, CSS
Frontend: React, Next.js, responsive UI, customer-facing workflows, accessibility basics, form validation
Backend & APIs: Node.js, Flask, REST APIs, batch jobs, third-party integrations, documentation, on-call troubleshooting
Data: PostgreSQL, MySQL, SQL Server, MongoDB, NoSQL patterns, schema design, query tuning, data validation
Delivery: Git/GitHub, CI/CD, Docker, Jenkins, automated tests, code reviews, Agile, AI coding tools

Projects

PiXMod Live | *Next.js, MongoDB, Stripe, Transformers*
- Built an **AI-powered responsive SaaS web app** with image workflows, semantic search, premium billing, and polished UX, increasing user upgrade conversion by **18%**.

HMIS Live | *MERN, TypeScript, ABDM APIs, Sentry*
- Built **healthcare web workflows** integrating patient, provider, claims, notifications, and monitoring features with secure APIs, structured validation, and production-style reliability.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*
- Built an **AI-powered SQL workspace** supporting 10+ databases, accelerating query authoring, schema exploration, and database management through Java services and TypeScript interfaces.
