Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Product-minded full-stack engineer with 2+ years building **React/TypeScript interfaces**, **Python APIs**, and **user-facing fintech products**, with experience shipping lovable features in fast-paced startup environments.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **Python-first platform services** for 500+ users, reducing request latency from **1.2s to 350ms** by optimizing execution paths and improving responsiveness for user-facing analytics dashboards with polished experiences.
- Implemented **automated validation and data pipelines** for 5,000+ monthly jobs, reducing downstream failures and improving product reliability through earlier detection of regressions and data-quality issues.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **full-stack features and REST APIs** handling 10,000+ daily requests, translating product requirements into maintainable backend services and responsive React interfaces while iterating rapidly on user feedback.
- Built **AI-assisted grading workflows** in a startup environment, reducing feedback turnaround by **60%** while partnering closely with product and design to ship lovable experiences for 150+ instructors.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Built **large-scale experimentation pipelines** across 100,000+ records, enabling reproducible evaluation and data-driven decision-making while balancing tradeoffs between model complexity and practical performance.
- Produced **technical documentation and test scenarios** translating findings into actionable guidance, improving cross-functional alignment and collaboration across research and engineering teams.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered **API and backend microservices** using AWS, improving response time by **30%** while finding creative solutions to balance performance, maintainability, and delivery timelines.
- Maintained **20+ automated test suites** using Jenkins and PyTest, increasing CI reliability by **68%** and improving confidence in frequent releases through collaborative code review practices.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Developed **MERN-based CRM platform** with WebSockets and RESTful APIs, syncing 2M+ records with **33% fewer conflicts** and real-time updates, empathizing with user workflows to build intuitive experiences.
- Automated **Docker-based deployment flows** with Jenkins, cutting release time by **50%** and enabling faster iteration cycles to ship product improvements more frequently.

Skills

Languages: **TypeScript**, **JavaScript**, **Python**, SQL, Java, C++, Bash
Frontend: **React**, Next.js, Redux, TailwindCSS, component-driven design, responsive UI
Backend & APIs: Node.js, FastAPI, Flask, Express.js, REST APIs, WebSockets
Databases: PostgreSQL, MySQL, MongoDB, Firebase, relational schema design
Cloud & Delivery: AWS, Docker, Kubernetes, CI/CD, Jenkins, Git/GitHub

Projects

FinNexus Live | *Next.js, TypeScript, Plaid, MongoDB, WebSockets, Kubernetes*

- Built a **fintech platform** supporting 50,000+ users and 1M+ transactions, with **Plaid bank linking**, real-time transaction updates, and a polished Next.js interface designed to delight users with seamless banking experiences.

PiXMod Live | *Next.js, MongoDB, Stripe, Transformers*

- Built an **AI-powered SaaS platform** with Stripe billing and MongoDB-backed workflows, improving premium conversion by **18%** through lovable user experiences and intuitive product design.

Big-Brain Live | *LLaMA-2, FAISS, PostgreSQL, Convex, Clerk*

- Built an **AI-powered document platform** with semantic search and real-time collaboration, supporting 200+ users with 95% query accuracy and reducing document review time by **60%** through thoughtful UX.
