Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer with 2+ years building **React/TypeScript applications**, backend APIs, cloud workflows, telemetry-minded dashboards, and AI-assisted tools; strong in Python, Node.js, REST services, Docker, CI/CD, and reliability-focused platform development.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built **SQL-backed platform workflows** for 500+ users, translating stakeholder needs into APIs, validation jobs, dashboards, release tasks, and documentation for operational support.
- Improved **platform reliability and observability** by tuning indexed queries, background jobs, and CI/CD releases, reducing dashboard latency from **1.2s to 350ms**.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed **React and Flask product features** handling 10,000+ daily requests, integrating REST APIs, file ingestion, OCR, and AI services into operational workflows.
- Built **moderation-adjacent review workflows** for AI-generated grading feedback, documenting edge cases, root causes, and fixes that reduced turnaround time by **60%**.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*
- Created **Python evaluation pipelines** across 100,000+ records, producing telemetry-style metrics, logs, and visual summaries for model analysis, validation, and debugging.
- Documented **prompt, reporting, and troubleshooting workflows** for researchers, turning ad hoc experiments into repeatable processes with clearer technical handoffs and traceable outputs.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered **API and ETL microservices** using Python, SQL, AWS Glue, and S3, improving response time by **30%** while supporting scalable integrations.
- Maintained **20+ automated test suites** using Jenkins, PyTest, and Mockito, increasing CI reliability by **68%**, reducing regressions, and improving release confidence.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built **MERN platform features** with REST APIs, WebSockets, and responsive interfaces, supporting 2M+ synchronized records across modular product and user workflows.
- Automated **Docker-based build and test flows** with Jenkins, cutting release time by **50%** and improving deployment consistency, troubleshooting, and documentation.

Skills

Frontend: React, TypeScript, JavaScript, Next.js, dashboards, internal tools, responsive UI, accessibility basics
Backend: Python, Node.js, Flask, FastAPI, REST APIs, microservices, policy/workflow services, batch jobs
Cloud & DevOps: AWS, GCP familiarity, Docker, Kubernetes familiarity, CI/CD, Jenkins, GitHub Actions, Linux
Data & Observability: PostgreSQL, MySQL, MongoDB, telemetry dashboards, logs, metrics, Sentry, data validation
Engineering: Git, code reviews, automated tests, Agile/Scrum, documentation, AI-assisted workflows, reliability

Projects

HMIS Live | *MERN, TypeScript, ABDM APIs, Sentry*
- Built **secure operational web workflows** integrating users, providers, claims, notifications, and monitoring features with APIs, structured validation, and production-style reliability.

PiXMod Live | *Next.js, MongoDB, Stripe, Transformers*
- Built an **AI-powered responsive SaaS web app** with image workflows, semantic search, premium billing, and polished UX, increasing user upgrade conversion by **18%**.

Big-Brain Live | *LLaMA-2, FAISS, PostgreSQL, GCP*
- Built a **secure document Q&A platform** with semantic search, summarization, and prompt workflows over 50K+ records, reducing review time by **60%**.
