Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Entry-level software engineer with 2+ years building **tested backend services**, data workflows, APIs, and developer tooling; strong in Python, JavaScript, SQL, Git, CI/CD, documentation, code reviews, and reliability-focused development.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Maintained **SQL-backed platform workflows** for 500+ users, completing scoped feature work, validation jobs, API updates, and documentation for production support.
- Improved **application reliability and performance** by tuning indexed queries, background jobs, and CI/CD releases, reducing dashboard latency from **1.2s to 350ms**.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed **React and Flask features** handling 10,000+ daily requests, implementing REST APIs, file ingestion, automated checks, and bug fixes under sprint deadlines.
- Supported **testing and verification cycles** by reproducing OCR, persistence, and rendering defects, documenting root causes and reducing feedback turnaround by **60%**.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*
- Built **Python evaluation pipelines** across 100,000+ records, producing reproducible metrics, logs, and reports for model analysis, validation, and debugging reviews.
- Documented **technical processes and experiment behavior** for researchers, turning ad hoc scripts into repeatable workflows with clearer handoffs and traceable outputs.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered **API and ETL microservices** using Python, SQL, AWS Glue, and S3, improving response time by **30%** while supporting data movement.
- Maintained **20+ automated test suites** using Jenkins, PyTest, and Mockito, increasing CI reliability by **68%**, reducing regressions, and improving releases.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built **MERN and database-backed modules** with REST APIs, WebSockets, and responsive interfaces, supporting 2M+ synchronized records across modular workflows.
- Automated **Docker-based build and test flows** with Jenkins, cutting release time by **50%** and improving deployment consistency and troubleshooting documentation.

Skills

Languages: Python, JavaScript, TypeScript, SQL, Java, C, C++, Bash, HTML/CSS
Backend: Flask, FastAPI, Node.js, REST APIs, ETL workflows, batch jobs, API documentation
Testing: Unit tests, integration tests, PyTest, Mockito, QA support, bug reproduction, verification cycles
Data & Storage: PostgreSQL, MySQL, SQL Server, MongoDB, AWS S3/Glue, schema design, query tuning
Delivery: Git/GitHub, code reviews, CI/CD, Jenkins, Docker, Linux, Agile/Scrum, technical documentation

Projects

Chat2SQL Code | *Java, TypeScript, SQL, Docker*
- Built an **AI-powered SQL workspace** supporting 10+ databases, accelerating query authoring, schema exploration, and database management through Java services and TypeScript interfaces.

Linguistix Code | *Python, AWS, Docker, CI/CD*
- Developed a **containerized REST processing API** with AWS deployment, CI/CD releases, validation checks, and reproducible execution, achieving **87%** classification accuracy.

CPU Scheduling Simulator Live | *C++, React.js, JavaScript*
- Implemented **C++ scheduling algorithms** including FCFS, SJF, SRT, RR, priority, and MLQ with metric calculation and visualization across 1K+ process simulations.
