# Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

## Summary

Software Engineer with 2+ years delivering **Java/Python full-stack systems**, building and consuming **REST APIs**, supporting legacy workflows, and shipping reliable features through **Agile** collaboration and CI/CD.

## Education

**University of Southern California, Los Angeles, CA** **August 2024 – May 2026**
*Master of Science in Computer Science* *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies

**Pandit Deendayal Energy University, Gandhinagar, India** **November 2020 – May 2024**
*Bachelor of Technology in Computer Science and Engineering* *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

## Experience

**USC Dornsife** **LA, California**
*Software Engineer* *September 2025 - Present*
- Designed and enhanced **backend services** on Azure SQL/PostgreSQL for 500+ users, reducing dashboard latency from 1.2s to 350ms through query tuning and schema optimization.
- Implemented release-validation workflows for 5K+ monthly jobs, improving debugging traceability, deployment confidence, and post-release support quality for legacy-compatible business processes and evolving product requirements.

**Grad8** **LA, California**
*Software Engineer Intern* *June 2025 - August 2025*
- Developed and tested **Flask + React** features handling 10K+ daily requests, translating product requirements into modular APIs, maintainable frontend components, and robust full-stack integration behavior.
- Added concurrent-processing controls and CI/CD checks via GitHub Actions, reducing turnaround time by 60% while maintaining stable release behavior during high-volume onboarding and grading workflows.

**Aasma Technology Solutions** **India**
*Software Developer Engineer - (SecureSync)* *August 2023 - July 2024*
- Engineered API and ETL components with OOP, AWS Glue, and S3, improving response times by 30% and enabling smoother integration across distributed services and data repositories.
- Maintained 20+ unit and integration suites with Jenkins, PyTest, and Mockito across three operating systems, improving regression coverage, release reliability, and team confidence in production deployments.

**Aasma Technology Solutions** **India**
*Full Stack Developer Intern - (VibrantChem)* *May 2023 - August 2023*
- Built REST API and WebSocket modules supporting eight workflows and 2M+ synchronized records, strengthening cross-service communication and reducing integration defects in evolving feature delivery cycles.
- Automated deployment and testing with Jenkins and Docker, reducing deployment time by 50% while improving repeatable containerized releases and post-deployment support in fast-moving Agile sprints.

**LST Capitals** **India**
*Web Developer Intern* *November 2022 - January 2023*
- Developed backend workflow integrations using Flask APIs and Firebase for 50K+ records, improving transactional reliability and enabling faster rollout of new platform capabilities across user operations.
- Documented webhook automation behavior and failure handling steps, improving cross-team troubleshooting, onboarding clarity, and process consistency for support tasks across modified systems and releases.

## Skills

**Languages**: **Java**, Python, JavaScript/TypeScript, SQL, C++
**Full Stack**: React.js, Flask, FastAPI, Node.js, Express.js, REST APIs, JSON
**Cloud & Containers**: AWS (S3/Glue/RDS), Azure SQL, Docker, Kubernetes, containerized deployment workflows
**Databases**: PostgreSQL, MySQL, SQL Server, MongoDB, relational schema design
**Quality & Delivery**: Unit testing, integration testing, CI/CD, Jenkins, GitHub Actions, Agile/Scrum, code reviews

## Projects

**FinNexus** Live | *Next.js, TypeScript, Kubernetes, MongoDB*
- Built secure full-stack platform workflows for 50K+ users and 1M+ transactions with real-time updates, containerized deployment support, and reliable cross-service integrations for production operations.

**Chat2SQL** Code | *Java, TypeScript, SQL, Maven, Docker*
- Developed a Java-centric SQL workspace spanning 10+ databases with schema-aware query generation, execution validation, and modular backend services that improved maintainability and accelerated iterative feature delivery.

**HMIS** Live | *MERN, ABDM APIs, Twilio*
- Designed API-driven healthcare operations supporting 100+ daily appointments, integrating monitoring-backed workflows that improved reliability, accelerated defect diagnosis, and delivered 2x faster record retrieval in production.
