Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years building **back-end web services** using **Python/Node-style APIs**, SQL data models, and CI-based testing, focused on reliability, maintainability, and collaborative Agile delivery.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 - Present*
- Built and maintained server-side workflows over **Azure SQL/PostgreSQL** for 500+ users, reducing dashboard latency from 1.2s to 350ms through query optimization and schema refactoring.
- Implemented reconciliation-backed release validation for 5K+ monthly jobs, improving data integrity, defect detection, and production troubleshooting using structured logging and documented operational checks.

Grad8 **LA, California**
Software Engineer Intern *June 2025 - August 2025*
- Developed **Flask** backend and React-integrated features handling 10K+ daily requests, mapping stakeholder requirements to modular APIs, secure ingestion paths, and maintainable MVC-style service boundaries.
- Added concurrent processing controls and CI/CD checks via GitHub Actions, reducing turnaround time by 60% while preserving stable behavior across production-like testing and deployment cycles.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 - July 2024*
- Engineered API and ETL services with OOP, AWS Glue, and S3, improving response times by 30% and supporting reliable integration with internal and third-party data workflows.
- Maintained 20+ unit and integration suites using Jenkins, PyTest, and Mockito across Linux and cross-platform environments, increasing pipeline efficiency by 68% and reducing technical debt.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 - August 2023*
- Built backend REST APIs and WebSocket services supporting eight workflows and 2M+ synchronized records, improving data consistency and feature rollout speed across customer-facing operational modules.
- Automated build, testing, and deployment with Jenkins and Docker, reducing release time by 50% and strengthening confidence in post-deployment behavior and production support handoffs.

LST Capitals **India**
Web Developer Intern *November 2022 - January 2023*
- Developed Flask API integrations and database-backed workflows over 50K+ records, enabling faster feature delivery and improved reliability for transaction, booking, and payment service operations.
- Created webhook-driven automations and technical documentation, improving process clarity, issue reproducibility, and collaboration with engineers and business stakeholders during debugging and requirement changes.

Skills

Languages: Python, JavaScript/TypeScript, Java, SQL, C++
Back-End Frameworks: Flask, FastAPI, Node.js, Express.js, REST APIs, MVC-style service design
Databases: PostgreSQL, MySQL, SQL Server, MongoDB, relational query debugging, data integrity checks
Cloud & DevOps: Azure SQL, AWS (S3/Glue/RDS), Git, Linux terminal workflow, Jenkins, Docker, CI/CD
Engineering Practices: Agile/Scrum, code reviews, API integration, production debugging, technical documentation

Projects

Chat2SQL Code | *Java, TypeScript, SQL, Maven, Docker*
- Built a backend-focused SQL workspace across 10+ databases with schema-aware query generation, execution validation, and structured summaries, enabling safer API-driven analytics and reduced manual query errors.

HMIS Live | *MERN, ABDM APIs, Twilio*
- Designed API-integrated healthcare workflows supporting 100+ daily appointments, with monitoring-backed operational checks and structured data access patterns that improved reliability and reduced record retrieval latency by 2x.

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB*
- Developed secure full-stack workflows for 50K+ users and 1M+ transactions, combining robust backend services, real-time updates, and scalable deployment practices supporting stable production behavior.
