Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years building **backend platform services**, writing **unit/integration validation workflows**, and improving cloud-hosted reliability using Java, Python, SQL, and collaborative Agile delivery practices.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 - Present*
- Designed and optimized **SQL-backed backend services** for 500+ users, reducing dashboard latency from 1.2s to 350ms through schema normalization, query tuning, and indexing improvements.
- Built validation and release workflows for 5K+ monthly jobs with reconciliation checks, improving platform reliability, debugging traceability, and handoffs for downstream product and operations teams.

Grad8 **LA, California**
Software Engineer Intern *June 2025 - August 2025*
- Developed Flask + React platform features handling 10K+ daily requests, translating user requirements into maintainable APIs, modular services, and iterative enhancements delivered through Agile collaboration.
- Implemented concurrent-processing controls and CI/CD checks via GitHub Actions, reducing turnaround time by 60% while preserving stable behavior and clear release confidence during peak usage.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 - July 2024*
- Engineered API and ETL integrations with OOP, AWS Glue, and S3, improving response times by 30% and enabling smoother integration into evolving platform environments.
- Maintained 20+ unit and integration test suites across three OS environments using Jenkins, PyTest, and Mockito, improving regression coverage, quality gates, and release consistency.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 - August 2023*
- Built REST API and WebSocket modules supporting eight workflows and 2M+ synchronized records, strengthening cross-service integration reliability and simplifying defect diagnosis through structured operational logging.
- Automated deployment and test pipelines using Jenkins and Docker, reducing deployment time by 50% and improving delivery predictability across iterative releases and environment updates.

LST Capitals **India**
Web Developer Intern *November 2022 - January 2023*
- Developed backend workflow integrations with Flask APIs and Firebase over 50K+ records, improving transactional data flow reliability and accelerating onboarding of new process requirements.
- Documented webhook-driven automation behavior and failure handling paths, improving team troubleshooting speed, issue reproducibility, and communication with stakeholders during production-impacting investigation cycles.

Skills

Languages: Java, Python, SQL, JavaScript/TypeScript, C++
Backend & Data: REST APIs, Flask, FastAPI, Node.js, PostgreSQL, MySQL, MongoDB, SQL Server
Cloud & Platform: AWS (S3/Glue/RDS), Azure SQL, Docker, Kubernetes, distributed service workflows
Testing & Quality: Unit testing, integration testing, CI/CD, PyTest, Mockito, Jenkins, regression validation
Process: Agile/Scrum, code reviews, design reviews, technical documentation, AI-assisted development workflows

Projects

Chat2SQL Code | *Java, TypeScript, SQL, Maven, Docker*
- Built a backend-oriented SQL workspace spanning 10+ databases with schema-aware query generation, execution validation, and structured summaries, supporting safer iteration across evolving data models and workflows.

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB*
- Developed scalable platform services for 50K+ users and 1M+ transactions, combining real-time synchronization, secure integrations, and reliable deployment workflows that supported stable product evolution.

HMIS Live | *MERN, ABDM APIs, Twilio*
- Designed API-driven healthcare workflows supporting 100+ daily appointments with monitoring-backed operations, improving record retrieval by 2x and reinforcing reliability across collaborative editing and operational handoff scenarios.
