Sahaj Bhadja

(213) 284-4651 sahajbhadja10@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years building **React** and **Node.js** applications, Python APIs, and **AI-enabled** features on AWS and Azure, with hands-on **CI/CD**, containers, observability, test automation, and Agile delivery alongside cross-functional stakeholders.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Built cloud data integration pipelines on Azure storage, SQL Server, and PostgreSQL with **CI/CD-backed releases**, reconciliation checks, and error handling, sustaining 99%+ production reliability across 5K+ monthly jobs.
- Restructured fault-tolerant **AI-enabled** job orchestration with FastAPI workers and explicit state transitions, processing 1K+ LLM jobs at 3x throughput, and cut dashboard latency from 1.2s to 350ms for 500+ users.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Built a **React** frontend and Flask REST backend for an AI grading platform, deployed through GitHub Actions to Render, Vercel, and AWS, serving 150+ instructors and 10K+ daily requests.
- Incorporated **intelligent automation** with GPT-4o, Claude, and Qwen-VL for rubric generation, OCR, and grading, with cost tracking and multithreaded batch processing, cutting feedback turnaround 60% at 90%+ consistency.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Maintained nightly Jenkins **CI/CD** that built executables, installed them on test VMs, ran 20+ PyTest and Mockito suites across Windows, Linux, and macOS, and reported coverage and failures automatically.
- **Led a team** redesigning AWS Glue and S3 ETL workflows, boosting pipeline efficiency 68% and cutting storage costs 15%, while improving API response times 30% in Agile sprints with Microsoft stakeholders.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built a **React and Node.js** platform with 8 microservices for authentication, resource allocation, billing, and notifications, pushing real-time WebSocket updates while syncing 2M+ records across multiple locations.
- Packaged services as **Docker** images through Jenkins CI/CD with automated tests and approval-gated staging releases on Azure, and added **observability** with Sentry, Azure Monitor, and Kibana, cutting deployment time 50%.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Designed the system workflow and **presented the end-to-end architecture** to the client, mapping 12+ integration points before building Flask booking, pricing, and coupon APIs with sub-200ms responses across 50K+ records.
- Supported **React Native** and React TypeScript clients with Firebase real-time sync and webhook-driven payment automation, improving booking confirmation speed 40% and cutting manual refund handling about 70%.

Skills

Languages: JavaScript, TypeScript, Python, Java, SQL, C++, Bash
Frontend & Backend: React, Next.js, React Native, Node.js, Express.js, FastAPI, Flask, REST APIs, Microservices
DevOps & Cloud: Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, AWS, Azure, Sentry, Azure Monitor, Kibana
QA & AI: PyTest, Mockito, Jest, Selenium, Test Automation, LLM Systems, OCR, PyTorch
Data & Practices: PostgreSQL, SQL Server, MongoDB, Agile/Scrum, Git, Technical Communication

Projects

Smart Building Occupancy Dashboard | *React, TypeScript, C#, .NET, PostgreSQL, Docker*

- Designed a **React** dashboard and **C# .NET** API that ingest occupancy and lighting sensor events, visualize space utilization by floor, and forecast usage to recommend energy-saving lighting schedules.

Release Health and Observability Toolkit | *Node.js, Docker, GitHub Actions, Prometheus, Grafana, LLM APIs*

- Designed a containerized **CI/CD** pipeline with canary deploys, Prometheus metrics, and Grafana SLO dashboards, plus an **LLM assistant** that summarizes failed builds and links likely causes for on-call engineers.

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB, TailwindCSS, CI/CD*

- Built a **Next.js** and TypeScript fintech platform with Plaid bank linking and real-time updates, deployed on **Kubernetes** with CI/CD automation, supporting 50,000+ users and 1M+ transactions securely.
