Sahaj Bhadja

(213) 284-4651 sahajbhadja10@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Developer with 2+ years building **production web applications**, content workflows, REST APIs, and database-backed features using C#, .NET, ASP.NET Core, React, JavaScript, SQL Server, Azure, automated testing, and CI/CD.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Built a **multi-tenant web platform** with React, FastAPI, Azure SQL, and indexed dashboards, translating user requirements into production features that reduced latency from 1.2 seconds to 350 milliseconds.
- Maintained asynchronous application workflows with explicit job states, failure isolation, and **production monitoring**, tripling throughput for 1K+ concurrent jobs while sustaining 99%+ reliability across 5K+ monthly runs.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Developed **React and Flask** features for uploads, rubrics, content history, and feedback, supporting 150+ instructors and 10K+ daily requests through responsive pages and tested production REST APIs.
- Collaborated with product users to troubleshoot issues and implement concurrent processing for 1K+ files, using **Git-based CI/CD** and integration tests to safely reduce feedback turnaround 60% at scale.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Refactored cross-platform services through **object-oriented design patterns**, reducing API latency 30%, technical debt 20%, and duplicated logic while improving maintainability across a reliable, scalable distributed content-sharing application.
- Rebuilt AWS Glue and S3 **data pipelines** with schema validation and incremental processing, improving efficiency 68%, then maintained 20+ automated test suites through Jenkins across three operating systems.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built a **React and Node.js** content-management platform for users, resources, permissions, and notifications, synchronizing 2M+ records through REST APIs and WebSockets with 33% fewer conflicts during daily operations.
- Owned eight services from implementation through **Docker and Jenkins** deployment, adding validation, monitoring, and secure access controls that reduced release time 50% while sustaining 95%+ workflow reliability.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Delivered **responsive React pages** for scheduling, pricing, coupons, and payment status, connecting Flask and SQL-backed APIs to 50K+ records while consistently keeping user-facing responses below 200 milliseconds.
- Translated stakeholder requirements into designs for 12+ **third-party integrations**, presenting prototypes and incorporating feedback before development to reliably reduce implementation errors 25% across collaborative client delivery cycles.

Skills

Languages: C#, JavaScript, TypeScript, SQL, HTML5, CSS3, Python, Java
Microsoft Stack: .NET, ASP.NET Core, ASP.NET MVC, Razor, Entity Framework Core, SQL Server, Azure, Azure DevOps
Frontend & Content: React, Next.js, Responsive Design, WCAG 2.2 AA, Accessibility Testing, Video Content, CMS, Umbraco
Backend & Data: RESTful APIs, Node.js, Flask, FastAPI, PostgreSQL, MySQL, Data Modeling, Authentication, RBAC
Engineering: Git, GitHub, CI/CD, Docker, Jenkins, Unit Testing, Integration Testing, Code Reviews, Debugging, Secure Coding, Agile, Documentation

Projects

Orientation Studio CMS | *C#, ASP.NET Core MVC, Razor, SQL Server, Azure, WCAG*

- Built a **cloud-hosted orientation CMS** for assembling branded video, quizzes, checklists, and accessible content, using Razor components, SQL Server models, and WCAG-tested responsive templates across desktop and mobile devices.

Engagement Analytics Platform | *C#, .NET, JavaScript, SQL Server, REST APIs, Azure DevOps*

- Built an **orientation analytics system** that records progress, completion, quiz results, and content interactions, exposing client dashboards and automated reports through tested .NET APIs and Azure DevOps pipelines.

HMIS Live | *React, TypeScript, Node.js, Appwrite, REST APIs, Sentry*

- Built a **full-stack workflow platform** with responsive forms, role-based permissions, structured records, API integrations, real-time notifications, and Sentry monitoring, supporting accessible user experiences and reliable production operations.
