Sahaj Bhadja

(213) 284-4651 sahajbhadja10@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-Stack Software Engineer with 2+ years building **React user interfaces**, Java and Spring Boot microservices, accessible web experiences, APIs, testing, and CI/CD, with practical **Generative AI** integration experience.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Owned a **multi-tenant web platform** from relational data modeling through React dashboards, reducing latency from 1.2 seconds to 350 milliseconds while supporting 500+ daily users and evolving requirements.
- Reworked asynchronous services with explicit job states, failure isolation, and production monitoring, tripling throughput for 1K+ concurrent jobs while maintaining **99%+ reliability** across 5K+ monthly production runs.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Shipped **React user interfaces** for uploads, grading, history, model selection, and feedback, supporting 150+ instructors and 10K+ daily requests through responsive components and tested Flask APIs reliably.
- Implemented concurrent processing and automatic AI-model fallbacks for 1K+ files per batch, reducing user turnaround time 60% while deploying changes through **unit testing, Git reviews, and CI/CD**.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Designed distributed integration services through **object-oriented architecture and microservices**, reducing API latency 30%, technical debt 20%, and duplicated logic while improving maintainability across a scalable cross-platform product.
- Automated 20+ unit and integration tests with PyTest, Mockito, Jenkins, and virtual-machine builds across Windows, Linux, and macOS, collaborating effectively through **Agile reviews and Git workflows** worldwide.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built a **React and Spring Boot operations platform** with REST APIs, PostgreSQL, role-based permissions, and notifications, synchronizing 2M+ records while reducing staged-release conflicts 33% during production launches.
- Owned eight microservices from implementation through Docker and Jenkins launch, adding **automated testing and monitoring** that reduced release time 50% while sustaining 95%+ reliability for customer workflows.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built **React and Java Spring Boot workflows** for bookings, payments, coupons, and real-time status updates, serving 50K+ records through user-facing APIs with sub-200-millisecond responses reliably at scale.
- Designed 12+ third-party integrations and presented UI prototypes, process flows, and technical solutions, incorporating stakeholder feedback before implementation to consistently reduce **design errors 25%** across delivery cycles.

Skills

Languages: Java 8, JavaScript, TypeScript, Python, SQL, HTML5, CSS3, XML, JSON, Bash, Shell, C++
Frontend & UI: React.js, Angular, Next.js, Responsive Design, Accessibility, WCAG, Component Design, Storybook, UI Prototyping, Sitemaps, Process Flows
Backend & Data: Spring Boot, Spring MVC, Spring Data JPA, Microservices, REST APIs, Flask, Node.js, PostgreSQL, MySQL, MongoDB, Redis
Testing & Delivery: JUnit, Mockito, Jest, PyTest, Unit Testing, Integration Testing, Git, Maven, Docker, Jenkins, GitHub Actions, CI/CD, Agile
AI & Engineering: OpenAI API, Generative AI, LLM Systems, Prompt Engineering, Requirements Gathering, Application Architecture, Object-Oriented Design, Code Reviews, Debugging, Technical Documentation

Projects

ComponentLab | *React, TypeScript, Storybook, Spring Boot, PostgreSQL, JUnit, WCAG*

- Designed an **accessible component and prototype workspace** with reusable React patterns, responsive states, keyboard navigation, documented interaction flows, and Spring Boot APIs, validating frontend behavior and service contracts through automated tests.

PromptCanvas | *React, Java, Spring Boot, OpenAI API, PostgreSQL, Docker*

- Built a **Generative AI interface platform** for reusable prompts, structured outputs, evaluation feedback, and versioned configurations, integrating React workflows with Spring Boot microservices, persistence, validation, and containerized deployment.

Chat2SQL | *Java, TypeScript, React, SQL, Maven, Node.js, Docker*

- Built an **AI-assisted Java and TypeScript workspace** supporting 10+ databases, schema exploration, SQL generation, responsive interfaces, and cross-platform Docker workflows across Windows, macOS, and Linux development environments.
