Sahaj Bhadja

(213) 284-4651 sahajbhadja10@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Early-career Software Engineer with 2+ years building **scalable web applications**, customer-facing features, backend services, and automated delivery pipelines using Java, React, AWS, Kubernetes, Ruby, Python, TypeScript, testing, and CI/CD.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Built a **multi-tenant web platform** with React, FastAPI, Azure SQL, and indexed dashboards, translating user needs into production features that reduced latency from 1.2 seconds to 350 milliseconds.
- Improved asynchronous backend workers with explicit job states, failure isolation, and **production monitoring**, tripling throughput for 1K+ concurrent jobs while maintaining 99%+ reliability across 5K+ monthly runs.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Developed **React and Flask** workflows for uploads, rubrics, grading history, and feedback, supporting 150+ instructors and 10K+ daily requests through responsive interfaces and tested REST APIs in production.
- Implemented concurrent processing for 1K+ files per batch with AWS RDS and automated **CI/CD releases**, reducing peak feedback turnaround 60% while delivering reliable customer-facing features into production.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Refactored distributed services through **object-oriented design patterns**, cutting API latency 30%, technical debt 20%, and duplicated logic while improving maintainability across a reliable, scalable cross-platform data-sharing application.
- Rebuilt AWS Glue and S3 **data pipelines** for incremental workloads, improving efficiency 68%, then maintained 20+ automated test suites through Jenkins across Windows, Linux, and macOS environments.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built a **React and Node.js** customer platform with REST APIs, WebSockets, permissions, and notifications, synchronizing 2M+ records across locations while reducing production conflicts 33% during staged rollouts.
- Owned eight backend services through **Docker and Jenkins** deployment, adding automated validation and monitoring that reduced release time 50% while sustaining 95%+ reliability across business-critical workflows daily.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Delivered **responsive React experiences** for booking, pricing, coupons, and payment status, connecting Flask APIs to 50K+ records while consistently keeping customer-facing responses below 200 milliseconds in production.
- Converted stakeholder requirements into technical designs for 12+ **third-party integrations**, presenting prototypes and incorporating feedback before implementation to reliably reduce design errors 25% across customer delivery cycles.

Skills

Languages: Java, Ruby, Python, TypeScript, JavaScript, SQL, HTML5, CSS3
Frontend: React, Next.js, Responsive Design, Accessibility, WebSockets, Tailwind CSS, Bootstrap, Browser APIs
Backend: Spring Boot, Ruby on Rails, Node.js, Express.js, FastAPI, Flask, REST APIs, Microservices
Cloud & Data: AWS, Kubernetes, Docker, S3, RDS, PostgreSQL, MySQL, SQL Server, MongoDB, Redis
Engineering: Git, Linux, CI/CD, GitHub Actions, Jenkins, PyTest, Jest, Unit Testing, Integration Testing, Monitoring, Code Reviews, Agile

Projects

CampaignFlow | *Java, Spring Boot, React, PostgreSQL, AWS, Kubernetes*

- Built a **customer-facing campaign platform** for designing, scheduling, and tracking email sends, using Spring Boot services, React templates, audience segmentation, and Kubernetes autoscaling to support reliable high-volume delivery.

Deliverability Lab | *Ruby on Rails, Redis, AWS, Docker, GitHub Actions*

- Built an **event-driven delivery service** with queued sends, retry policies, suppression rules, and engagement analytics, using Redis workers and automated CI/CD checks to protect throughput and message reliability.

HMIS Live | *React, TypeScript, Node.js, Appwrite, REST APIs, Sentry*

- Built a **full-stack workflow platform** with responsive forms, role-based permissions, API integrations, real-time notifications, and Sentry monitoring, successfully supporting reliable customer-facing operations from implementation through production deployment.
