Sahaj Bhadja

(213) 284-4651 sahajbhadja10@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

AI-native Full-Stack Engineer with 2+ years delivering **end-to-end web features**, business workflows, APIs, databases, testing, and deployments using **React, TypeScript, Node.js, Python, SQL**, and cloud platforms.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Owned a **multi-tenant business platform** from relational data modeling through React dashboards, reducing latency from 1.2 seconds to 350 milliseconds while supporting 500+ daily users and evolving requirements.
- Reworked asynchronous services with explicit job states, failure isolation, and **production monitoring**, tripling throughput for 1K+ concurrent jobs while maintaining 99%+ reliability across 5K+ monthly production runs.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Shipped **React and Flask features** for uploads, grading, history, and feedback, supporting 150+ instructors and 10K+ daily requests through responsive interfaces and tested production APIs reliably at scale.
- Implemented concurrent processing and automatic model fallbacks for 1K+ files per batch, reducing user turnaround time 60% while deploying changes through **Git reviews and CI/CD** safely in production.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Simplified distributed integration services through **object-oriented architecture**, reducing API latency 30%, technical debt 20%, and duplicated logic while improving maintainability across a reliable, scalable cross-platform data-sharing product.
- Rebuilt AWS Glue and S3 **event-processing pipelines**, improving efficiency 68%, then maintained 20+ automated tests and Jenkins releases across diverse Windows, Linux, and macOS production environments worldwide.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built a **React and Node.js operations platform** with APIs, WebSockets, permissions, and notifications, synchronizing 2M+ records across locations while reducing staged-release conflicts 33% during major production launches.
- Owned eight services from implementation through Docker and Jenkins launch, adding **automated testing and monitoring** that reduced release time 50% while sustaining 95%+ reliability for customer workflows.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built **transactional booking and payment workflows** with React, Node.js, MySQL, coupons, and real-time status updates, serving 50K+ records through user-facing APIs with sub-200-millisecond responses reliably at scale.
- Designed 12+ third-party integrations for payments, synchronization, and webhooks, presenting prototypes and incorporating client feedback before implementation to consistently reduce **design errors 25%** across product delivery cycles.

Skills

Languages: JavaScript, TypeScript, Python, Java, SQL, HTML5, CSS3, Bash, Shell, JSON, XML, YAML
Frontend: React.js, Next.js, Responsive Design, Component Design, State Management, Tailwind CSS, Accessibility, Browser APIs
Backend & Data: Node.js, Express.js, Flask, FastAPI, REST APIs, Webhooks, PostgreSQL, MySQL, MongoDB, Redis, Firebase, Data Modeling
Cloud & Delivery: AWS, Microsoft Azure, Docker, Kubernetes, Linux, Git, GitHub Actions, Jenkins, CI/CD, Deployment Workflows, Monitoring
Engineering: Unit Testing, Integration Testing, Jest, PyTest, Agile, Code Reviews, API Integration, Debugging, Requirements Analysis, Technical Documentation, AI-Assisted Development, Prompt Engineering

Projects

CampaignFlow | *React, TypeScript, Node.js, MySQL, Redis, REST APIs, Docker*

- Designed a **customer-journey automation system** with configurable triggers, audience filters, delayed actions, reusable email templates, and Redis-backed scheduling, plus admin permissions and previewable workflow states for safe releases.

PopupPilot | *React, TypeScript, Node.js, PostgreSQL, Webhooks, Jest, GitHub Actions*

- Built a **configurable storefront pop-up platform** supporting targeting rules, subscriber capture, coupon assignment, customer tagging, and event analytics, with webhook synchronization, automated tests, and containerized deployment workflows.

FinNexus | *Next.js, TypeScript, MongoDB, Plaid, WebSockets, Kubernetes*

- Built a **real-time financial product** integrating Plaid accounts, transaction synchronization, filtering dashboards, and notifications, using TypeScript services and Kubernetes deployment to support secure workflows across 1M+ transactions.
