Summary

Full-stack Software Developer with 2+ years building business web applications and web services on the **Microsoft** stack with **C#/.NET**, **SQL Server**, and Azure, plus React frontends, API integrations, logging and error handling, and DevOps automation.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Designed multi-tenant storage on **Azure SQL** and Blob Storage with row-level security for 500+ users, tuning indexed queries to cut dashboard latency from 1.2s to 350ms in production.
- Built integration web services across **SQL Server**, PostgreSQL, and cloud storage with error handling, reconciliation checks, and CI/CD-backed releases, sustaining 99%+ reliability over 5K+ monthly production jobs.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Built a **full-stack web application** with a React frontend and Flask REST services on AWS for upload, rubric, and grading workflows, serving 150+ instructors and 10K+ daily requests in production.
- Integrated external AI **APIs** from OpenAI, Anthropic, and Qwen with timeout handling, fallbacks, and per-call usage logging in MySQL, keeping responses stable at peak load and cutting feedback turnaround 60%.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Implemented **DevOps** automation in Jenkins that built executables, deployed them to test VMs, ran 20+ unit and integration suites nightly, and emailed failure logs and coverage reports to the team.
- Troubleshot large-scale API integrations and refactored modules with object-oriented design patterns, improving response times 30% through caching and pagination and cutting **technical debt** 20% in Agile sprints.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built **C# ASP.NET Core** web services and a React frontend for a business resource-management platform on Azure SQL and Azure App Services, syncing 2M+ records across locations in real time.
- Improved **logging and error handling** with Sentry, Azure Monitor, and Kibana, and automated Jenkins CI/CD with Docker packaging, ARM templates, and approval-gated staged releases, cutting deployment time 50%.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Storyboarded system flows in **Figma** and presented the end-to-end architecture to the client, cutting design errors 25% before building Flask booking, pricing, and coupon APIs under 200ms.
- Integrated external **payment APIs** for multi-currency cards, wallets, and PayPal through idempotent webhooks, automating refunds and disputes and cutting manual handling about 70% across 50K+ booking records.

Skills

Languages: C#, Python, JavaScript, TypeScript, SQL, Java, HTML, CSS
Microsoft Stack: .NET, ASP.NET Core, SQL Server, Azure SQL, Azure App Services, Azure Blob Storage, Azure Monitor
Web & APIs: React, REST APIs, Web Services, Microservices, Flask, FastAPI, WebSockets, Webhooks
DevOps: Jenkins, CI/CD, Docker, GitHub Actions, Git, Sentry, Kibana, Error Tracking, ARM Templates
Data & Practices: PostgreSQL, MySQL, Unit Testing, PyTest, Figma, Agile/Scrum, Design Patterns, AWS

Projects

Field Test Results Portal | *C#, ASP.NET Core, Entity Framework Core, SQL Server, Azure, React*

- Designed an **ASP.NET Core** app where field technicians log soil and concrete test results, lab staff review and approve them, and approved results generate client reports and sync to a project-accounting API.

Azure DevOps Release Pipeline | *.NET, Azure DevOps, Application Insights, Docker, xUnit*

- Designed an **Azure DevOps** pipeline for .NET services with automated unit tests, staged slot deployments, structured logging and error alerts in Application Insights, and rollback steps to reduce manual **release** work.

Chat2SQL Code | *Java, TypeScript, SQL Server, PostgreSQL, MySQL, Docker*

- Extended an AI-assisted database workspace supporting 10+ engines including **SQL Server**, with schema synchronization, a query console, and AI-generated SQL reaching 82% accuracy across Windows, macOS, and Linux.
