Sahaj Bhadja

(213) 284-4651 sahajbhadja10@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Forward Deployed Software Engineer with 2+ years delivering **enterprise AI solutions**, customer-facing integrations, document workflows, and production systems using Python, TypeScript, React, FastAPI, SQL, cloud services, CI/CD, and cross-functional implementation.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**

Master of Science in Computer Science *GPA: 3.75/4*

Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**

Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*

Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**

Forward Deployed Software Engineer *Los Angeles, CA*

- Partnered with instructors to translate operational needs into a **multi-tenant AI platform**, designing isolated data workflows and indexed dashboards that cut latency from 1.2 seconds to 350 milliseconds.
- Owned asynchronous **LLM workflow delivery** from architecture through production support, adding explicit job states and failure isolation that tripled throughput across 1K+ concurrent jobs and 5K+ monthly runs.

Grad8 **June 2025 – August 2025**

Software Engineer Intern *Los Angeles, CA*

- Worked directly with instructors to deploy **AI-assisted document workflows** for uploads, rubrics, grading, and feedback, supporting 150+ users and 10K+ daily requests through React and Flask in production.
- Integrated GPT-4o, Claude, Qwen-VL, and OCR with automatic fallbacks and concurrent processing for 1K+ files, reducing **customer turnaround time** 60% during peak production demand reliably at scale.

Aasma Technology Solutions **August 2023 – July 2024**

Software Developer Engineer – SecureSync *India*

- Mapped customer data flows into **cross-system integrations** using REST APIs, AWS Glue, and S3, increasing pipeline efficiency 68%, reducing response times 30%, and eliminating duplicated service logic.
- Presented implementation tradeoffs to stakeholders while maintaining 20+ automated test suites and Jenkins releases across Windows, Linux, and macOS, strengthening **deployment reliability** for customer environments and production rollouts.

Aasma Technology Solutions **May 2023 – August 2023**

Full Stack Developer Intern – VibrantChem *India*

- Built a **business operations platform** for customers, billing, permissions, and notifications, synchronizing 2M+ records through React, Node.js, REST APIs, and WebSockets with 33% fewer conflicts during production operations.
- Owned eight services from requirements through **production deployment**, adding Docker, Jenkins, validation, and monitoring that cut release time 50% while maintaining 95%+ workflow reliability across customer rollouts.

LST Capitals **November 2022 – January 2023**

Web Developer Intern *India*

- Translated client requirements into **end-to-end booking workflows** for scheduling, pricing, coupons, and payment updates, delivering React and Flask experiences with sub-200-millisecond responses across 50K+ records in production.
- Designed technical specifications for 12+ **external system integrations**, presenting prototypes and incorporating stakeholder feedback before implementation to consistently reduce design errors 25% and accelerate customer approval cycles.

Skills

Languages: Python, TypeScript, JavaScript, C++, Java, SQL, HTML5, CSS3
AI & Automation: LLM APIs, GPT-4o, Claude, OCR, Prompt Engineering, Retrieval-Augmented Generation, Document Processing, Human-in-the-Loop
Applications: React, Next.js, Node.js, FastAPI, Flask, REST APIs, Webhooks, WebSockets, Microservices
Data & Cloud: PostgreSQL, SQL Server, MongoDB, AWS, Azure, S3, RDS, Docker, Kubernetes, ETL
Delivery: Customer Discovery, Requirements Gathering, Solution Architecture, Git, CI/CD, Jenkins, Testing, Monitoring, Debugging, Stakeholder Communication, Agile

Projects

OrderBridge AI | *Python, FastAPI, TypeScript, React, OCR, LLM APIs, PostgreSQL*

- Built an **AI order-entry system** that extracts line items from emails, PDFs, and spreadsheets, validates customer and product records, and posts approved orders into ERP APIs with complete audit trails.

QuotePilot | *Python, React, PostgreSQL, Rules Engine, REST APIs, Docker*

- Built a **customer quoting platform** that combines pricing rules, inventory data, and margin thresholds to generate reviewable quotes, flag anomalies, and track approvals through reliable human-in-the-loop workflows.

Chat2SQL | *Java, TypeScript, SQL, PostgreSQL, MySQL, Docker, Maven*

- Built a **natural-language data interface** spanning 10+ databases, validating generated SQL, visualizing results, and packaging services with Docker and Maven so business users could explore legacy operational systems safely.
