Sahaj Bhadja

(213) 284-4651 sahajbhadja10@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack Software Engineer with 2+ years building **.NET** and Python web services, **React** frontends, and relational **SQL** schemas, with object-oriented design, automated testing, CI/CD, and Agile Scrum delivery on Azure and AWS.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Designed normalized relational **schemas** in PostgreSQL and Azure SQL for a multi-tenant platform serving 500+ users, adding row-level security and indexes that cut dashboard latency from 1.2s to 350ms.
- Built cloud integration services across FastAPI, SQL Server, and Azure storage with **CI/CD-backed releases** and reconciliation checks, and restructured async job processing to triple throughput across 1K+ jobs.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Built a **React** web dashboard and REST APIs with JSON payloads for upload, rubric, and grading workflows on AWS, serving 150+ instructors and 10K+ daily requests in production.
- Kept APIs stable under peak **load** with multithreaded batch processing of 1K+ files per run, plus GitHub Actions CI/CD and AI grading workflows that cut feedback turnaround 60%.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Built **object-oriented** Java and Python modules using Singleton and Factory **design patterns** for web service integrations, and transformed JSON, CSV, and Parquet data through AWS Glue, improving pipeline efficiency 68%.
- Ran unit and integration testing with 20+ PyTest and Mockito suites in nightly Jenkins pipelines within **Agile Scrum** sprints, and debugged APIs to improve response times 30% for low-bandwidth users.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built a **.NET** web application with C# ASP.NET Core REST services, a React frontend, and Azure SQL, across 8 microservices for authentication, billing, and leads, syncing 2M+ records across locations.
- Automated Jenkins **CI/CD** with unit, integration, and end-to-end tests, Docker packaging, and staged releases to Azure App Services, cutting deployment time 50% and reaching 95%+ successful build validation.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built a React and TypeScript web dashboard and Flask REST APIs for bookings, pricing, and coupons, keeping responses under 200ms across 50K+ booking records with **JWT**-secured access.
- Designed the end-to-end architecture and **presented it to the client**, then integrated payment webhooks with idempotent handling for refunds and disputes, cutting manual payment handling about 70%.

Skills

Languages: C#, Java, Python, JavaScript, TypeScript, SQL, HTML, CSS
.NET & Backend: .NET, ASP.NET Core, REST APIs, Web Services, Microservices, FastAPI, Flask, JSON, XML
Frontend & Data: React, Next.js, PostgreSQL, SQL Server, Azure SQL, MySQL, Schema Design
Engineering Practices: Object-Oriented Design, Design Patterns, Unit Testing, Integration Testing, PyTest, Mockito, Jest
Cloud & DevOps: Azure, Azure App Services, AWS, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, Agile/Scrum

Projects

Injury Claims Intake Portal | *C#, ASP.NET Core MVC, Entity Framework Core, SQL Server, React, xUnit*

- Designed a service-oriented **ASP.NET Core** claims intake app with **dependency injection**, value objects for claim and provider data, Entity Framework migrations on SQL Server, and unit and integration tests.

Self-Service .NET Service Template | *.NET, Docker, GitHub Actions, Kubernetes, AWS*

- Designed a self-service template that scaffolds new .NET services with **CI/CD** pipelines, health checks, container builds, and unit, integration, and **load-test** stages before automated deployment to Kubernetes on AWS.

HMIS – Hospital Management Information System Live | *MERN, TypeScript, ABDM APIs, Twilio, Sentry*

- Won Smart India Hackathon with a TypeScript **healthcare** platform for consent-based ABDM patient history access, appointment booking, Twilio reminders, and Sentry monitoring, reducing hospital administrative workload 30%.
