Sahaj Bhadja

(213) 284-4651 sahajbhadja10@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Frontend-focused Software Engineer with 2+ years building customer-facing **React** and **TypeScript** web apps with Node.js and Python backends, **SQL** databases, automated testing, and security-minded authentication and access control.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Designed multi-tenant SQL schemas with **row-level security** for 500+ users and tuned indexed queries that cut dashboard latency from 1.2s to 350ms, keeping each tenant's data isolated.
- Built Python API services and data pipelines with validation and reconciliation checks across PostgreSQL and SQL Server, sustaining 99%+ reliability over 5K+ monthly jobs through **CI/CD** releases.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Built the customer-facing **React** frontend for upload, rubric generation, grading, and history views, implementing designs as reusable components wired to REST APIs for 150+ instructors and 10K+ daily requests.
- Kept the UI responsive during large uploads with multithreaded batch processing and secure PDF, DOCX, and ZIP ingestion backed by **MySQL** on AWS RDS, cutting feedback turnaround 60%.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Optimized API responses for low-bandwidth users with pagination, field filtering, and caching so clients loaded only the data they needed, improving **response times** 30% across large-scale integrations.
- Built object-oriented modules with Singleton and Factory patterns and 20+ **automated tests** in PyTest and Mockito, run nightly in Jenkins across Windows, Linux, and macOS in Agile sprints.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built a **TypeScript** React frontend and Node.js services with JWT authentication and **role-based access** for customer, billing, and lead workflows, pushing real-time WebSocket updates across 2M+ synced records.
- Wrote Jest unit tests and Selenium end-to-end tests that gated Jenkins CI/CD releases, and ran Snyk and OWASP dependency checks for **security**, reaching 95%+ successful build validation.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built a **React and TypeScript** web dashboard with Firebase real-time booking status updates on top of Flask APIs, keeping responses under 200ms and improving cross-platform compatibility 15%.
- Designed the system workflow and flows in **Figma**, cutting design errors 25%, then presented the end-to-end architecture to the client and added wallet-signature login without stored passwords.

Skills

Languages: JavaScript, TypeScript, HTML, CSS, Python, SQL, Java
Frontend: React, Next.js, Angular.js, TailwindCSS, Responsive Design, WebSockets, Figma
Backend: Node.js, Express.js, REST APIs, Microservices, Flask, FastAPI, Agile
Data & Security: MySQL, PostgreSQL, SQL Server, AWS (RDS, S3), JWT, Role-Based Access Control, Row-Level Security, Snyk
Testing & Tools: Jest, Selenium, PyTest, Unit Testing, End-to-End Testing, CI/CD, Jenkins, GitHub Actions, Docker, Git, Vercel

Projects

Payroll Review Interface | *Vue 3, TypeScript, Vite, PostCSS, Playwright*

- Designed a **Vue 3** and TypeScript interface for reviewing payroll runs, with editable data tables, inline validation, accessible on-brand components styled with PostCSS, and **Playwright** end-to-end tests.

Backend-for-Frontend Gateway | *Node.js, Fastify, TypeScript, MySQL, AWS*

- Designed a **Fastify** backend-for-frontend in TypeScript that combines employee, benefits, and payroll microservice data into UI-shaped endpoints, with session checks, MySQL-backed lookups, response caching, and **schema-validated** payloads.

FinNexus Live | *Next.js, TypeScript, TailwindCSS, MongoDB, Kubernetes, WebSockets*

- Built a **Next.js** and TypeScript fintech frontend with TailwindCSS, Plaid bank linking, a token-based firewall for secure access, and real-time updates, supporting 50,000+ users and 1M+ transactions.
