Sahaj Bhadja

(213) 284-4651 sahajbhadja10@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years supporting production systems, investigating alerts and failures, and automating repetitive work with **Python**, **SQL**, and **Bash**, plus clear **documentation** and collaboration with engineers and non-technical users.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Analysis of Algorithms, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Operating Systems, Software Engineering, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Monitored and maintained 5K+ monthly production integration jobs across SQL Server, PostgreSQL, and cloud storage, using **reconciliation checks** and error handling to investigate failures and sustain 99%+ reliability.
- Wrote **SQL** queries and indexes against normalized multi-tenant schemas for 500+ users, cutting dashboard latency from 1.2s to 350ms, and isolated failing Python background jobs to prevent cascading outages.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Supported a production AI grading platform on AWS for 150+ instructors and 10K+ daily requests, **troubleshooting** OCR timeouts and model failures with automatic fallbacks that kept responses stable at peak load.
- Built **Python** batch automation with multithreading and secure PDF, DOCX, and ZIP ingestion to process 1K+ uploaded files per run, plus per-call usage logs in MySQL, cutting feedback turnaround 60%.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- **Automated** a nightly Jenkins workflow that allocated test VMs, pulled the latest build, installed executables, ran 20+ integration and unit suites, and emailed CSV reports with failure logs.
- **Troubleshot** API integrations for low-bandwidth users across Windows, Linux, and macOS by reading failure logs, then added pagination, field filtering, and caching that improved response times 30%.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Monitored a multi-site platform with Sentry, Azure Monitor, and Kibana, investigating **alerts** and errors across 8 microservices while real-time WebSocket sync kept 2M+ records consistent across locations.
- **Automated** builds, tests, and staged deployments through Jenkins CI/CD with Docker packaging and manual approval gates, cutting deployment time 50% and reaching 95%+ successful build validation across release runs.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Resolved wallet **connectivity issues** on Android and iOS devices and improved cross-platform compatibility 15%, while Firebase real-time sync sped booking confirmations 40% across mobile and web clients.
- Mapped 12+ integration points and **explained the end-to-end architecture** to the client, then automated refund and dispute handling through idempotent webhooks, cutting manual payment work about 70%.

Skills

Scripting & Query: Python, SQL, Bash, Shell, JavaScript, TypeScript, Java
Troubleshooting & Monitoring: Log Analysis, Root Cause Analysis, Debugging, Sentry, Azure Monitor, Kibana, Error Tracking
Automation: Jenkins, CI/CD, GitHub Actions, Test Automation, VM Automation, Docker, Batch Processing
Systems & Networking: Linux, Windows, macOS, TCP/IP, REST APIs, WebSockets, AWS, Azure
Data & Docs: PostgreSQL, SQL Server, MySQL, SQLite, Data Validation, Technical Documentation, CSV Reporting, Git, Agile, PyTest, Customer Communication

Projects

Sensor Fleet Health Monitor | *Python, SQL, Bash, MQTT, Grafana, Linux*

- Designed a **Python** service that tracks heartbeats from deployed sensor devices, detects downtime and network flapping, runs remote ping and camera diagnostics, and opens tickets with logs and **SQL** uptime reports.

Field Install Assistant | *Python, Flask, SQLite, Bash*

- Designed a mobile-friendly **install checklist** app that walks field technicians through device setup, runs connectivity and power checks, captures photos, and generates **SOP**-aligned install reports for engineering review.

Chat2SQL Code | *Java, TypeScript, SQL, PostgreSQL, MySQL, Docker*

- Extended a cross-platform **SQL** workspace supporting 10+ databases on Windows, macOS, and Linux, with schema exploration, structure synchronization, a query console, and AI-generated queries reaching 82% accuracy.
