Summary

PHP Full-Stack Developer with 2+ years building **responsive e-commerce and business applications**, relational data models, APIs, and customer workflows using **PHP, JavaScript, React, HTML5, CSS3, MySQL**, and Git.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Owned a **multi-tenant web application** from normalized relational modeling through React dashboards, reducing latency from 1.2 seconds to 350 milliseconds while supporting 500+ daily users and evolving requirements.
- Built backend integrations across FastAPI, SQL Server, PostgreSQL, and cloud storage, processing 5K+ monthly jobs with **validation, reconciliation, and error handling** while consistently maintaining 99%+ production reliability.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Shipped **responsive React interfaces** for uploads, grading, history, model selection, and feedback, supporting 150+ instructors and 10K+ daily requests through reusable components and tested Flask APIs reliably.
- Implemented concurrent processing and automatic model fallbacks for 1K+ files per batch, reducing user turnaround time 60% while deploying changes through **Git reviews, automated testing, and CI/CD**.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Simplified distributed integration services through **object-oriented architecture**, reducing API latency 30%, technical debt 20%, and duplicated logic while improving maintainability across a reliable, scalable cross-platform data-sharing product.
- Rebuilt AWS Glue and S3 event-processing pipelines, improving efficiency 68%, then maintained 20+ **automated tests and Jenkins releases** across diverse Windows, Linux, and macOS production environments worldwide.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built a **PHP and React operations platform** with MySQL, REST APIs, permissions, and real-time notifications, synchronizing 2M+ records while reducing staged-release conflicts 33% during major production launches.
- Owned eight services from implementation through Docker and Jenkins launch, adding **automated testing and monitoring** that reduced release time 50% while sustaining 95%+ reliability for customer workflows.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built **PHP, React, and MySQL workflows** for bookings, payments, coupons, and real-time status updates, serving 50K+ records through responsive user-facing APIs with sub-200-millisecond responses reliably at scale.
- Designed 12+ third-party integrations for payments, synchronization, and webhooks, presenting prototypes and incorporating client feedback before implementation to consistently reduce **design errors 25%** across product delivery cycles.

Skills

Languages & Web: PHP, JavaScript, TypeScript, Python, Java, SQL, HTML5, CSS3, SASS, XML, JSON, Bash, Shell
Frontend: React.js, jQuery, Bootstrap, Vue.js Concepts, Next.js, Responsive Design, Mobile-First Design, Component Design, Accessibility, Browser APIs
Backend & Data: Object-Oriented PHP, REST APIs, Node.js, Flask, FastAPI, MySQL, PostgreSQL, SQL Server, MongoDB, Redis, Relational Data Modeling
E-Commerce: Product Catalogs, Search and Filtering, Shopping Cart, Checkout, Payments, Order Management, Inventory Workflows, Customer Accounts, Image Optimization
Engineering: Git, SVN Concepts, Docker, Jenkins, GitHub Actions, CI/CD, Unit Testing, Integration Testing, Debugging, Performance Optimization, Agile, Code Reviews, Requirements Analysis, Technical Documentation

Projects

CatalogCore | *PHP, MySQL, React, Bootstrap, SASS, Redis, Docker*

- Designed a **large-catalog e-commerce platform** with normalized product variants, faceted search, comparison, inventory status, image optimization, and responsive merchandising pages, using Redis caching and indexed MySQL queries for efficient browsing.

DesignQuote Portal | *PHP, React, MySQL, jQuery, Bootstrap, REST APIs*

- Built a **customer project and quotation portal** supporting saved products, configurable specifications, consultation requests, role-based trade accounts, and order-status workflows through responsive interfaces, relational persistence, and tested API integrations.

PiXMod | *Next.js, TypeScript, MongoDB, Stripe, CLIP, SAM, Stable Diffusion*

- Built a **visual product SaaS platform** with responsive image workflows, semantic search, subscription billing, and scalable metadata storage, integrating Stripe payments and AI-assisted segmentation, restoration, and content discovery features.
