Sahaj Bhadja

(213) 284-4651 sahajbhadja10@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years designing **secure financial and business applications**, relational data models, and API integrations using **JavaScript, C++, SQL, HTML/CSS, XML**, Agile delivery, and automated testing.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Web Technologies, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Architected a **multi-tenant relational data model** with row-level isolation, normalized tables, and indexed access paths, reducing dashboard latency from 1.2 seconds to 350 milliseconds for 500+ users.
- Built ETL-style integrations across FastAPI, SQL Server, PostgreSQL, and cloud storage, processing 5K+ monthly jobs with **validation, reconciliation, and error handling** while consistently maintaining 99%+ reliability in production.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Shipped **React and Flask features** for uploads, grading, history, and feedback, supporting 150+ instructors and 10K+ daily requests through responsive interfaces and tested production APIs reliably at scale.
- Implemented concurrent processing and automatic model fallbacks for 1K+ files per batch, reducing user turnaround time 60% while deploying changes through **Git reviews and CI/CD** safely in production.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Simplified distributed integration services through **object-oriented architecture**, reducing API latency 30%, technical debt 20%, and duplicated logic while improving maintainability across a reliable, scalable cross-platform data-sharing product.
- Rebuilt AWS Glue and S3 **event-processing pipelines**, improving efficiency 68%, then maintained 20+ automated tests and Jenkins releases across diverse Windows, Linux, and macOS production environments worldwide.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built a **C# and ASP.NET Core operations platform** with Azure SQL, REST APIs, role-based permissions, and notifications, synchronizing 2M+ records while reducing staged-release conflicts 33% during production launches.
- Owned eight services from implementation through Docker and Jenkins launch, adding **automated testing and monitoring** that reduced release time 50% while sustaining 95%+ reliability for customer workflows.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built **transactional booking and payment workflows** with React, JavaScript, SQL, coupons, and real-time status updates, serving 50K+ records through user-facing APIs with sub-200-millisecond responses reliably at scale.
- Designed 12+ **third-party API integrations** for payments, synchronization, and webhooks, presenting prototypes and incorporating client feedback before implementation to consistently reduce design errors 25% across delivery cycles.

Skills

Languages & Web: JavaScript, TypeScript, C++, C#, Python, Java, SQL, HTML5, CSS3, XML, JSON, Bash, Shell
Applications & APIs: ASP.NET Core, React.js, Node.js, Flask, FastAPI, REST APIs, Webhooks, API Integration, Client-Server Architecture, Scripting
Data: SQL Server, Azure SQL, PostgreSQL, MySQL, MongoDB, Redis, Relational Databases, Data Modeling, Tables, Fields, Relationships, Query Optimization
Security & Infrastructure: Authentication, Role-Based Access Control, JWT, Secure Transactions, Audit Logging, TCP/IP, LAN/WAN Concepts, Linux, Windows, Docker
Engineering: Git, Jenkins, GitHub Actions, CI/CD, Unit Testing, Integration Testing, Debugging, Agile, Object-Oriented Design, Design Patterns, Requirements Analysis, Technical Documentation, Code Reviews

Projects

CoreLink Banking Gateway | *C#, ASP.NET Core, SQL Server, XML, REST APIs, JWT*

- Designed a **secure financial-integration gateway** that validates account requests, maps XML and JSON messages, enforces role-based access, records immutable audit events, and handles idempotent retries across external service adapters.

MemberOps Console | *React, TypeScript, C#, ASP.NET Core, SQL Server, Docker*

- Built a **financial operations console** for account lookup, transaction review, configurable permissions, and case tracking, using normalized relational schemas, server-side validation, automated tests, and containerized deployment workflows.

FinNexus | *Next.js, TypeScript, MongoDB, Plaid, WebSockets, Kubernetes*

- Built a **secure financial platform** integrating Plaid account linking, transaction synchronization, advanced filtering, and real-time updates, supporting 50K+ users and 1M+ transactions through scalable TypeScript services and Kubernetes deployment.
