Sahaj Bhadja

(213) 284-4651 sahajbhadja10@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

GTM-focused Software Engineer with 2+ years automating **CRM workflows, data integrations, and lifecycle operations** using HubSpot, Python, JavaScript, SQL, n8n, APIs, and AI-assisted tooling.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Forward Deployed Software Engineer *Los Angeles, CA*

- Translated stakeholder requirements into automated data workflows connecting FastAPI services, PostgreSQL, SQL Server, and cloud storage, running 5K+ monthly jobs with **validation, deduplication, and 99%+ production reliability**.
- Designed normalized schemas, indexed dashboard queries, and failure-isolated background jobs for 500+ users, reducing latency from 1.2 seconds to 350 milliseconds and tripling **workflow automation throughput** reliably.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Built React and Flask workflows supporting 150+ instructors and 10K+ daily requests, automating onboarding, uploads, status updates, and follow-ups through **API-driven lifecycle stages** and internal production-facing dashboards.
- Developed AI-assisted grading operations across GPT-4o, Claude, and Qwen-VL with automated routing, provider fallbacks, and validation, reducing feedback turnaround 60% through scalable **AI-native workflow optimization** in production.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Engineered integrations between business systems using REST APIs, pagination, field mapping, validation, and caching, improving response times 30% and reducing manual entry 35% through **reliable data synchronization**.
- Redesigned AWS Glue and S3 data workflows, improving pipeline efficiency 68%, while 20+ automated tests and Jenkins CI strengthened **data quality standards** across Windows, Linux, and macOS.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built HubSpot-integrated CRM workflows for customer records, leads, billing, permissions, and notifications, synchronizing 2M+ records through **custom properties, REST APIs, webhooks**, and real-time React dashboards across locations.
- Automated lifecycle updates and handoffs with JavaScript services, validation rules, and idempotent integrations, while Jenkins CI/CD and Docker staging reduced **CRM deployment time** 50% across controlled releases.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built customer booking workflows for scheduling, pricing, coupons, and payment-status updates, processing 50K+ records through **sub-200-millisecond APIs**, configurable forms, and client-facing React and TypeScript business operational dashboards.
- Designed integration contracts for 12+ endpoints and idempotent payment webhooks, translating stakeholder needs into documented workflows while reducing **upstream data and design errors** 25% before technical implementation.

Skills

GTM Systems: HubSpot CRM, Operations Hub, Sales Hub, Marketing Hub, Workflows, Lead Scoring, Lead Routing, Lifecycle Stages, Custom Objects, Custom Properties, Forms, Sequences, Campaign Operations
Automation & Enrichment: n8n, Zapier, Clay, Apollo, Webhooks, REST APIs, Data Enrichment, Deduplication, Data Validation, Field Mapping, List Building, Multi-Channel Outbound
Languages & Data: JavaScript, TypeScript, Python, SQL, HTML, CSS, PostgreSQL, SQL Server, MongoDB, Data Modeling, ETL, Analytics, Reporting
Engineering: React, Node.js, Flask, FastAPI, AWS, Docker, Git, GitHub, CI/CD, Jenkins, Unit Testing, Integration Testing, Debugging, Agile, Documentation, AI-Assisted Development, Stakeholder Collaboration

Projects

RevenueFlow HubSpot Engine | *HubSpot Operations Hub, JavaScript, Python, SQL*

- Designed HubSpot workflows for lifecycle stages, lead scoring, routing, ownership, and follow-ups, using **custom objects and coded actions** to automate handoffs, enforce standards, and keep reporting trustworthy.

EnrichLoop GTM Automation | *n8n, Clay, Apollo, HubSpot API, Python*

- Built an n8n enrichment pipeline connecting Clay, Apollo, and HubSpot to deduplicate accounts, validate contacts, enrich firmographics, assemble campaign lists, and trigger **multi-channel outbound sequences** with documented recovery paths.

Hospital Management Information System | *React, Node.js, MongoDB, HubSpot API, Sentry, Twilio*

- Built a management application with responsive workflows, secure APIs, customer and appointment records, **HubSpot lifecycle synchronization**, Twilio notifications, MongoDB data models, and Sentry monitoring for reliable issue diagnosis.
