Summary

Full-stack Software Engineer with 2+ years and multiple internships building **Python**, **Django**, and Flask backends with **React** and React Native frontends, RESTful APIs, payment workflows, and Dockerized CI/CD on AWS.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Built **Python** FastAPI services and data integration pipelines across PostgreSQL, SQL Server, and cloud storage with validation and CI/CD-backed releases, sustaining 99%+ reliability over 5K+ monthly jobs.
- Designed multi-tenant schemas with row-level security and indexed queries for 500+ users, cutting dashboard latency from 1.2s to 350ms, and tripled **background job** throughput across 1K+ jobs.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Built a customer-facing **React** dashboard and modular **Flask** REST backend for upload, rubric, and grading workflows on AWS, serving 150+ instructors and 10K+ daily requests in production.
- Shipped AI grading features with GPT-4o, Claude, and Qwen-VL through GitHub Actions CI/CD, with fallbacks and batch processing that cut instructor feedback turnaround 60% at 90%+ consistency.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Designed and optimized **RESTful APIs** for low-bandwidth users with pagination, field filtering, and caching, improving response times 30% and cutting technical debt 20% through object-oriented refactoring of API modules.
- Wrote 20+ **testable** unit and integration suites with PyTest and Mockito in nightly Jenkins pipelines, and redesigned AWS Glue ETL, boosting pipeline efficiency 68% in Agile sprints.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built a **Django and React** platform for billing, invoices, payments, customer records, and leads with REST APIs and real-time WebSocket updates, syncing 2M+ records across multiple locations in real time.
- Packaged services as **Docker** images through Jenkins CI/CD with code review, automated tests, and staged releases, and used analytics to cut resource wastage 42% and lift conversions 15%.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built Flask **payment** APIs for multi-currency cards, wallets, and PayPal with idempotent webhooks for refunds, disputes, and chargebacks, cutting manual refund handling about 70% across 50K+ records.
- Supported **React Native** Android and iOS clients and a React TypeScript dashboard with Firebase real-time updates, improving booking confirmation speed 40% and cross-platform compatibility 15% across Android, iOS, and web.

Skills

Languages: Python, JavaScript, TypeScript, SQL, Java, HTML, CSS
Backend: Django, Flask, FastAPI, REST APIs, Microservices, Webhooks, Node.js
Frontend: React, React Native, Next.js, TailwindCSS, WebSockets, Linux, Postman
Data & Cloud: PostgreSQL, MySQL, SQL Server, Firebase, AWS (S3, RDS, Glue), Docker, Kubernetes
Practices: PyTest, Jest, Selenium, Unit Testing, Code Reviews, CI/CD, GitHub Actions, Jenkins, Git, Agile, Stripe, Payments

Projects

Payroll-Deduction Repayment Tracker | *Python, Django REST, React, Redux, PostgreSQL*

- Designed a **Django** and React app that schedules interest-free installment plans from paycheck deductions, tracks on-time payments, flags missed ones, and shows members a **repayment history** timeline.

Credit-Building Progress App | *React Native, Redux, Django REST, PostgreSQL, Docker*

- Designed a **React Native** app with Redux state that shows credit-score trends, upcoming payments, and personalized tips from a Django API, with push reminders and **tested** components.

FinNexus Live | *Next.js, TypeScript, Plaid, MongoDB, Kubernetes, WebSockets*

- Built a **fintech** platform with Plaid bank linking, a token-based firewall, real-time updates, and transaction filtering, supporting 50,000+ users and 1M+ transactions with automated CI/CD deployments on Kubernetes.
