Sahaj Bhadja

(213) 284-4651 sahajbhadja10@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Junior Software Developer with 2+ years building and maintaining **React**, **TypeScript**, and JavaScript applications, REST APIs, internal tools, automated tests, and production workflows using Git, CI/CD, cloud platforms, and AI-assisted development.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Built **React dashboards** and FastAPI services for an education platform, translating instructor feedback into accessible interfaces and indexed queries that reduced latency from 1.2 seconds to 350 milliseconds.
- Troubleshot production failures across **existing codebases**, isolating asynchronous job states and adding validation and monitoring that sustained 99%+ reliability while processing more than 5K monthly AI jobs.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Developed **React and Flask** workflows for uploads, rubrics, grading history, and feedback, supporting 150+ instructors and 10K+ daily requests through tested REST APIs and responsive interfaces in production.
- Implemented concurrent file processing and multimodal routing with **CI/CD deployments**, reducing feedback turnaround 60% while reviewing changes through Git branches, pull requests, tests, and staged releases safely.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Refactored object-oriented integration modules and **REST APIs** for secure cross-platform data sharing, improving response times 30%, reducing technical debt 20%, and simplifying maintenance across reliable production services.
- Created 20+ **unit and integration tests** with PyTest and Mockito, automating Jenkins validation across Windows, Linux, and macOS while documenting failures for collaborative debugging and release decisions.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built a **React and TypeScript** internal platform for customer records, billing, permissions, and notifications, synchronizing 2M+ entries through REST APIs and WebSockets with 33% fewer conflicts daily.
- Maintained eight Node.js services and production workflows using **Git, Jenkins, and Docker**, adding automated validation and staged deployments that safely reduced release time 50% across business-critical features.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Delivered **responsive React interfaces** for booking, pricing, coupons, and payment status, connecting Flask APIs to more than 50K records while consistently keeping customer-facing responses below 200 milliseconds.
- Translated client requests into technical designs for 12+ **API integrations**, presenting prototypes, incorporating feedback, and reducing implementation errors 25% through clear documentation and early stakeholder review sessions.

Skills

Languages: TypeScript, JavaScript, Python, Java, SQL, HTML5, CSS3, C++, Bash
Frontend: React, Next.js, Tailwind CSS, Bootstrap, Responsive Design, Accessibility, WebSockets, Browser APIs
Backend: Node.js, Express.js, Flask, FastAPI, Django, REST APIs, GraphQL, Microservices, Webhooks
Data & Cloud: PostgreSQL, MySQL, SQL Server, MongoDB, SQLite, AWS, Azure, GCP, Docker, Firebase
Quality & Tools: Git, GitHub, Branching, Pull Requests, Jest, PyTest, Playwright, Selenium, CI/CD, GitHub Actions, Jenkins, Sentry, Code Reviews, Agile, Debugging, Unit Testing, Integration Testing, AI Coding Tools

Projects

Client Intake and Case Portal | *React, TypeScript, Node.js, PostgreSQL, REST APIs, Playwright*

- Built a **responsive case portal** for guided intake, document status, and milestone tracking, connecting validated React forms to Node.js APIs and PostgreSQL with role-based access and Playwright tests.

AI Development Support Console | *Next.js, TypeScript, FastAPI, GitHub API, OpenAI API, Jest*

- Built an **AI-assisted engineering tool** that searches repository context, explains unfamiliar code, drafts tests, and summarizes failures, while requiring developer review and automated checks before suggested changes are accepted.

HMIS Live | *React, TypeScript, Node.js, Appwrite, REST APIs, Sentry*

- Built a **full-stack workflow platform** with accessible forms, role-based permissions, ABDM API integrations, real-time notifications, and Sentry monitoring, streamlining record management while supporting reliable daily user-facing operations.
