Sahaj Bhadja

(213) 284-4651 sahajbhadja10@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years building **Java** and Python **REST** web services, JavaScript web applications, and **object-oriented** designs, with JSON and structured-content processing, automated **unit testing**, production support, and Agile Scrum delivery.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Data Retrieval, Operating Systems

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Built **REST** services and integration pipelines with FastAPI over PostgreSQL, SQL Server, and cloud storage, processing 5K+ monthly jobs at 99%+ reliability through validation checks and CI/CD-backed production releases.
- Supported production for a multi-tenant platform of 500+ users, tuning indexed queries to cut dashboard latency from 1.2s to 350ms and isolating failing background jobs to prevent **cascading failures**.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Built a web application with a **JavaScript** React frontend calling Flask **REST** endpoints that exchanged JSON for upload, rubric, and grading workflows, serving 150+ instructors and 10K+ daily requests on AWS.
- Implemented **secure parsing** of PDF, DOCX, and ZIP uploads with multithreaded batch processing of 1K+ files per run, keeping APIs stable at peak load and cutting feedback turnaround 60%.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Built **object-oriented** Java and Python modules using Singleton and Factory **design patterns** for large-scale API integrations, with 20+ Mockito and PyTest unit and integration suites run nightly in Jenkins.
- Transformed JSON, CSV, and Parquet from multiple sources into normalized formats with AWS Glue, and tuned API responses with pagination and caching, improving efficiency 68% and response times 30% in **Agile** sprints.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built **Java Spring Boot** RESTful microservices with dependency-injected service layers and a JavaScript frontend for authentication, billing, and leads, syncing 2M+ records across locations through real-time WebSocket updates.
- Ran **automated unit**, integration, and end-to-end tests in Jenkins CI/CD before staged releases, and used Sentry and Kibana logs to resolve production issues, reaching 95%+ successful build validation.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built **Spring Boot** and Flask REST APIs exchanging JSON for bookings, pricing, and coupon validation, keeping core responses under 200ms across 50K+ records and streamlining project delivery 22%.
- Worked with the client to refine requirements, mapped 12+ integration points, and **presented the architecture** before implementation, then automated refund handling through idempotent webhooks, cutting manual work about 70%.

Skills

Languages: Java, JavaScript, TypeScript, Python, SQL, HTML, CSS
Web & Services: Spring Boot, REST APIs, Microservices, JSON, XML, Flask, FastAPI, React, Node.js, WebSockets
Design & Quality: Object-Oriented Design, Design Patterns, Unit Testing, Integration Testing, Mockito, PyTest, Jest, Selenium
Data: PostgreSQL, SQL Server, MySQL, Azure SQL, ETL Pipelines
Tools & Practices: Git, Maven, Jenkins, CI/CD, Docker, AWS, Sentry, Kibana, Agile/Scrum, Production Support

Projects

Regulatory Document XML Pipeline | *Java, Spring Boot, JAXB, XSLT, XSD, JUnit*

- Designed a **Java** Spring service that parses regulator documents, validates them against XSD schemas, transforms them with **XSLT** into normalized XML, and serves XML and JSON through REST endpoints with unit tests.

Editorial Publishing Console | *JavaScript, jQuery, AJAX, CSS, Spring MVC, SOAP*

- Designed an internal editor console using **jQuery and AJAX** to search, preview, and publish content items through REST services, plus a **SOAP** adapter generated from WSDL to sync a legacy content feed.

Chat2SQL Code | *Java, TypeScript, Maven, Docker, SQL, PostgreSQL*

- Extended a **Java** and TypeScript database workspace built with Maven and Docker, supporting 10+ databases with schema synchronization and AI-assisted SQL generation reaching 82% accuracy across Windows, macOS, and Linux.
