Sahaj Bhadja

(213) 284-4651 sahajbhadja10@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack Software Engineer with 2+ years building **Java** and **Spring Boot** microservices, REST APIs, and **Angular**/React frontends over SQL Server and PostgreSQL, applying design patterns, automated testing, and CI/CD in Agile Scrum teams.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Built fault-tolerant asynchronous job processing with explicit **state transitions** and failure isolation, handling 1K+ background jobs at 3x throughput and preventing cascading failures under concurrent production load in a multi-tenant platform.
- Built integration pipelines across **SQL Server**, PostgreSQL, and cloud storage with incremental loads, reconciliation checks, and CI/CD-backed releases, sustaining 99%+ reliability over 5K+ monthly production jobs for 500+ users.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Built a full-stack application with a React frontend and modular MVC REST backend on AWS for upload, rubric, and grading workflows, serving 150+ instructors and 10K+ **daily requests** reliably.
- Designed **concurrent batch processing** with a thread pool and fault-tolerant execution for 1K+ files per run, keeping APIs stable at peak load and cutting feedback turnaround 60%.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Built **object-oriented** Java modules using Singleton and Factory **design patterns** for cross-platform data-sharing microservices, covered by 20+ Mockito and PyTest unit and integration suites run nightly in Jenkins.
- Maintained Jenkins **continuous delivery** with feature, staging, and production branches across Windows, Linux, and macOS, and optimized API integrations to improve response times 30% in Scrum sprints.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built **Java Spring Boot** microservices with Hibernate on Azure SQL and an **Angular** TypeScript frontend for resource allocation, billing, and leads, syncing 2M+ records across multiple locations in real time.
- Automated Maven builds, unit, integration, and end-to-end tests, and Docker packaging in Jenkins CI/CD with staged releases, cutting deployment time 50% while analytics-guided fixes reduced resource wastage 42%.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built **Spring Boot** and Flask REST APIs for bookings, time-slot reservations, and payments, using transactional locking to prevent double-booked slots and keeping responses under 200ms across 50K+ records.
- Mapped 12+ backend integration points and presented the end-to-end architecture to the client, then automated refund and dispute handling through **idempotent webhooks**, cutting manual work about 70%.

Skills

Languages: Java, JavaScript, TypeScript, SQL, Python, HTML, CSS
Backend: Spring Boot, Hibernate, REST APIs, Microservices, Design Patterns, Object-Oriented Design, Webhooks
Frontend: Angular, React, Next.js, TailwindCSS, WebSockets, AWS, Azure
Data: SQL Server, Azure SQL, PostgreSQL, MySQL, Oracle, Query Optimization
Delivery: Maven, Git, Jenkins, CI/CD, Docker, Mockito, Jest, Selenium, PyTest, Postman, Unit Testing, Jira, Agile/Scrum

Projects

Warehouse Inventory Event Service | *Java, Spring Boot, Hibernate, Kafka, SQL Server, JUnit*

- Designed a test-driven **Spring Boot** service that tracks pallet receiving, putaway, and shipping as events, enforces temperature-zone storage rules, and publishes **inventory** updates to downstream systems through Kafka.

Dock Scheduling Dashboard | *Angular, TypeScript, Spring Boot, REST APIs, Oracle*

- Designed an **Angular** dashboard and REST API that schedule inbound and outbound truck appointments across loading docks, flag late arrivals and capacity conflicts, and show live **dock utilization** for operators.

Chat2SQL Code | *Java, TypeScript, Maven, Oracle, SQL Server, Docker*

- Extended a **Java** and TypeScript database workspace built with Maven and Docker, supporting 10+ engines including Oracle and SQL Server, with schema synchronization and AI-generated SQL reaching 82% accuracy.
