Sahaj Bhadja

(213) 284-4651 sahajbhadja10@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Associate Software Engineer with 2+ years supporting **web platforms**, REST integrations, structured data, access controls, automated workflows, testing, and production operations using JavaScript, HTML/CSS, Python, SQL, Git, CI/CD, and cloud services.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Designed normalized **data schemas** with row-level access controls, indexed queries, and validation rules for a multi-tenant platform while reducing dashboard latency from 1.2 seconds to 350 milliseconds.
- Troubleshot asynchronous workflow failures across FastAPI services, adding explicit status transitions, audit-friendly logs, and **system health monitoring** that sustained 99%+ reliability across 5K+ monthly production jobs during operations.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Built reusable **React forms and templates** for uploads, rubrics, grading history, and feedback, supporting 150+ instructors and 10K+ daily requests through validated Flask REST APIs in production.
- Automated concurrent document ingestion and **Sandbox-to-Production releases** through Git reviews and CI/CD checks, reducing peak turnaround 60% while maintaining reliable, repeatable deployments across application environments and critical workflows.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Maintained cross-system **field mappings and synchronization logic** through REST APIs, schema validation, and incremental data pipelines, improving response times 30% and reducing overall integration-related technical debt 20%.
- Developed 20+ unit and integration tests for datatype changes, API failures, and cross-platform compatibility, using **Jenkins automation** to reliably validate all releases across Windows, Linux, and macOS.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built a **React and Node.js** operational platform for contacts, accounts, permissions, billing, and notifications, synchronizing 2M+ records through REST APIs and WebSockets with 33% fewer conflicts daily.
- Implemented role-based access, reusable service modules, and **automated workflows** across eight microservices, then deployed through Jenkins and Docker, reducing release time 50% while maintaining 95%+ validation coverage.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Created responsive **HTML, CSS, and React** interfaces for booking, pricing, coupons, and payment status, connecting Flask APIs to 50K+ records while keeping user-facing responses below 200 milliseconds.
- Translated stakeholder needs into technical designs for 12+ **third-party integrations**, documenting field behavior, validation rules, and webhook flows while reducing implementation errors 25% through early reviews and testing.

Skills

Languages & Web: JavaScript, TypeScript, Python, SQL, HTML5, CSS3, Java, JSON
CRM Automation: Marketo, Salesforce, HubSpot, Campaign Automation, Segmentation, Landing Pages, Forms, Tokens
Integration & Data: REST APIs, Webhooks, Field Mapping, Schema Alignment, Data Governance, PostgreSQL, SQL Server, ETL
Development: React, Node.js, Flask, FastAPI, Microservices, Role-Based Access Control, Sandbox Testing, Responsive Design
Quality & Operations: Git, Jenkins, Docker, CI/CD, Unit Testing, Integration Testing, Troubleshooting, Monitoring

Projects

Marketing Automation Governance Hub | *Marketo, Salesforce, JavaScript, HTML/CSS, REST APIs*

- Built a **Marketo governance workspace** with reusable landing-page templates, tokens, naming conventions, role permissions, and Salesforce field mappings, validating campaign assets across Sandbox and Production before activation.

Campaign Sync and Data Quality Monitor | *Python, FastAPI, PostgreSQL, Salesforce API, Docker*

- Built an **integration monitoring service** that reconciles lead and contact fields, detects schema conflicts, retries failed webhooks, and surfaces campaign-health alerts through dashboards with traceable audit logs.

HMIS Live | *React, TypeScript, Node.js, Appwrite, REST APIs, Sentry*

- Built a **full-stack workflow platform** with validated forms, role-based permissions, structured records, ABDM API integrations, real-time notifications, and Sentry monitoring, supporting reliable operations and secure cross-system data exchange.
