Sahaj Bhadja

(213) 284-4651 sahajbhadja10@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Associate Software Engineer with 2+ years building **Java and Spring Boot services**, React and TypeScript interfaces, PostgreSQL data models, secure APIs, automated testing, event-driven integrations, and **AI-assisted development** workflows.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Architected a **multi-tenant PostgreSQL data model** with row-level isolation, normalized schemas, and indexed access paths, reducing dashboard latency from 1.2 seconds to 350 milliseconds while supporting 500+ users.
- Built event-driven integrations across FastAPI, SQL Server, PostgreSQL, and cloud storage, processing 5K+ monthly jobs with **validation, reconciliation, observability, and failure isolation** while maintaining 99%+ production reliability.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Shipped **React user interfaces and Flask APIs** for uploads, grading, history, and feedback, supporting 150+ instructors and 10K+ daily requests through responsive components and tested production services reliably.
- Implemented concurrent processing and automatic AI-model fallbacks for 1K+ files per batch, reducing user turnaround time 60% while delivering **small, independently testable changes** through Git reviews and CI/CD.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*

- Designed distributed integration services through **object-oriented architecture and microservices**, reducing API latency 30%, technical debt 20%, and duplicated logic while improving maintainability across a scalable cross-platform product.
- Automated 20+ **unit and integration tests** with PyTest, Mockito, Jenkins, and virtual-machine builds across Windows, Linux, and macOS, collaborating effectively through Agile reviews and Git workflows worldwide.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*

- Built a **React and Spring Boot operations platform** with REST APIs, PostgreSQL, role-based permissions, and notifications, synchronizing 2M+ records while reducing staged-release conflicts 33% during production launches.
- Owned eight microservices from implementation through Docker and Jenkins launch, adding **automated testing and monitoring** that reduced release time 50% while sustaining 95%+ reliability for customer workflows.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built **React and Java Spring Boot workflows** for bookings, payments, coupons, and real-time status updates, serving 50K+ records through user-facing APIs with sub-200-millisecond responses reliably at scale.
- Designed 12+ third-party integrations and presented prototypes to stakeholders, incorporating product feedback before implementation to consistently reduce **design errors 25%** across collaborative, incrementally delivered software development cycles.

Skills

Languages: Java, TypeScript, JavaScript, Python, SQL, HTML5, CSS3, C++, Bash, Shell, JSON, XML
Frontend: React.js, Next.js, Responsive Design, Accessibility, WCAG, Component Design, State Management, Browser APIs
Backend & Data: Spring Boot, Spring MVC, Spring Data JPA, REST APIs, Microservices, Flask, FastAPI, PostgreSQL, SQL Server, MySQL, MongoDB, Redis
Quality & Delivery: JUnit, Mockito, Jest, PyTest, Unit Testing, Integration Testing, API Testing, End-to-End Testing, Git, Maven, Docker, Jenkins, GitHub Actions, CI/CD, Agile
Engineering: Event-Driven Systems, Application Security, Secure Coding, Observability, Performance Optimization, Scalability, Data Modeling, Object-Oriented Design, Data Structures, Algorithms, Code Reviews, Debugging, Technical Documentation, AI-Assisted Development

Projects

CareMetrics API Hub | *Java, Spring Boot, React, PostgreSQL, Kafka, JUnit, Docker*

- Designed a **secure healthcare analytics platform** with documented REST APIs, event-driven ingestion, normalized PostgreSQL models, accessible React dashboards, role-based authorization, observability, and automated unit, integration, API, and end-to-end tests.

DeliveryLab | *TypeScript, React, Java, Spring Boot, OpenAI API, GitHub Actions*

- Built an **AI-assisted development workbench** that converts structured work items into implementation plans, test suggestions, and pull-request checklists, while preserving repository guidance, human review, validation, and continuous feedback.

HMIS – Hospital Management Information System | *React, TypeScript, ABDM APIs, Sentry, Twilio*

- Built a **healthcare workflow platform** integrating consent-based patient-history access, appointment management, Twilio alerts, and Sentry monitoring, helping clinicians retrieve records 2x faster while supporting 100+ daily appointments.
