Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | sahaj-bhadja | sahaj-bhadja | sahaj-bhadja

Summary

Customer-focused software engineer with 2+ years translating business workflows into technical presentations, REST integrations, database-backed applications, and documentation across transaction, analytics, cloud, and AI-enabled platforms.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Web Technologies, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Data Retrieval, Operating Systems

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – June 2026*
- Architected multi-tenant Azure SQL and Blob Storage services for 500+ users, translating stakeholder requirements into secure workflows and optimized dashboards that reduced response latency from 1.2 seconds to 350 milliseconds.
- Built fault-tolerant FastAPI workflows for 1,000+ monthly jobs using explicit states, validation, and failure isolation, tripling throughput while documenting integration behavior and improving operational visibility for users.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Engineered Python REST APIs and instructor-facing React workflows handling 10,000+ daily requests, converting grading requirements into intuitive upload, review, feedback, and reporting experiences for 150+ users.
- Designed concurrent batch processing for 1,000+ files with secure ingestion and AWS RDS persistence, reducing turnaround by 60% while supporting end-user troubleshooting and iterative product improvements.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered cross-platform microservices and 20+ automated test suites through Jenkins CI/CD, collaborating with Microsoft and GitHub stakeholders during Agile reviews to deliver reliable Windows, Linux, and macOS releases.
- Analyzed API and ETL workflows using object-oriented patterns, AWS Glue, S3, and SQL, reducing response times by 30% and improving customer-facing data-processing efficiency by 68%.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Developed a MERN resource-management platform with REST APIs, WebSockets, and eight services, supporting 2M+ synchronized records while translating product requirements into inventory, billing, customer, and notification workflows.
- Automated Docker-based builds and deployments through Jenkins CI/CD, reducing release time by 50% while improving product documentation, rollout consistency, and defect resolution across frequent customer-facing releases.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Mapped 12+ backend integration points for a booking and payment platform, documented end-to-end workflows, and presented the proposed architecture to the client before implementation and delivery alignment.
- Built Flask APIs supporting reservations, pricing, payments, and status updates across 50,000+ records, reducing manual payment handling by 70% through Firebase synchronization and webhook-based automation.

Skills

Solutions & Business: workflow analysis, requirements gathering, technical presentations, product documentation, process mapping, stakeholder communication, technical support, customer feedback, solution design, system integration, business workflows, payment workflows, transaction processing, reporting; **Technology:** Python, Java, JavaScript, TypeScript, SQL, React, Node.js, FastAPI, Flask, REST APIs, JSON, WebSockets, microservices, PostgreSQL, SQL Server, Azure SQL, MySQL, MongoDB, Firebase, AWS RDS, ETL, analytics, data integration; **Delivery:** AWS, Azure, Docker, Kubernetes, Jenkins, Git, CI/CD, automated testing, debugging, performance optimization, Agile/Scrum, code review, AI-assisted development, cross-functional collaboration

Projects

FinNexus Live | *Next.js, TypeScript, MongoDB, Plaid, Kubernetes*
- Built a transaction platform supporting 50,000+ users and 1M+ records with secure account linking, real-time synchronization, advanced filtering, and scalable payment visibility across distributed services.

HMIS Live | *TypeScript, MERN, REST APIs, Sentry, Twilio*
- Built a workflow platform integrating appointment scheduling, consent-based APIs, automated alerts, and operational dashboards, reducing administrative workload by 30% through streamlined user and staff processes.

Chat2SQL Code | *Java, TypeScript, SQL, Docker, REST APIs*
- Built an AI-assisted database workspace supporting 10+ systems, accelerating SQL authoring, schema exploration, validation, and data demonstrations through a unified interface for technical and non-technical workflows.
