Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Cloud and backend engineer pursuing an MSCS at USC with 2+ years deploying **AWS and Azure cloud services**, automating **infrastructure-as-code provisioning and CI/CD**, and building containerized, reliable production systems across distributed environments.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Computer Networks, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Operating Systems, Database Systems, Software Engineering, Object-Oriented Programming

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Designed and deployed **cloud services on Azure** (Azure SQL, Blob Storage) for 500+ users with secure multi-tenant storage and networking, cutting query latency from 1.2s to 350ms in a high-performance production environment.
- Automated **provisioning and CI/CD deployment** of backend services and data pipelines across 5K+ monthly jobs, scripting reliable releases with validation and reconciliation checks for 99%+ production reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Deployed and maintained **AWS-backed production services** (RDS, REST APIs) handling 10K+ daily requests, automating CI/CD releases with GitHub Actions for scalable, reliable cloud delivery.
- Built **containerized backend workflows** with multithreading and automated deployment, optimizing compute and storage usage while sustaining stable performance under sustained production load for 150+ users.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered **AWS cloud pipelines** (Glue, S3) with automated multi-region build, provisioning, and VM-based test infrastructure across Windows, Linux, and macOS, improving pipeline efficiency **68%** in production.
- Built **CI/CD automation and scripts** (Jenkins, PyTest) for nightly provisioning, deployment, and integration testing, improving response times **30%** and reducing manual deployment effort across cross-platform releases.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Provisioned **cloud infrastructure on Azure** using ARM templates (infrastructure-as-code) and Azure App Services, automating repeatable deployments and scaling for microservices handling 2M+ records.
- Automated **Docker-based CI/CD deployment** via Jenkins with Azure Monitor and Sentry for observability, cutting release time **50%** and improving stability across staging and production environments.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Deployed **cloud-hosted backend services and APIs** (AWS, Flask, Firebase) for a cross-platform platform across 50K+ records, integrating real-time sync and third-party services with sub-200ms responses.
- Mapped 12+ backend integration points and automated **payment and refund workflows** via webhooks, reducing manual handling **70%** while documenting deployment architecture for client stakeholders.

Skills

Cloud Platforms: AWS (EC2, S3, RDS, Glue, Lambda), Microsoft Azure (SQL, Blob, App Services), GCP, Cloud Migration, Cloud Modernization
Infrastructure as Code: ARM Templates, Terraform, CloudFormation, Ansible, Automated Provisioning, Scripting
Containers & Serverless: Docker, Kubernetes, AWS Lambda, Azure Functions, Serverless, Microservices
DevOps & CI/CD: CI/CD, Jenkins, GitHub Actions, GitLab CI, Git, Monitoring (Azure Monitor, Sentry)
Databases & Storage: PostgreSQL, MySQL, Azure SQL, SQL Server, S3, Blob Storage
Languages & OS: Python, Bash, Shell, SQL, Linux, Networking

Projects

Linguistix Code | *AWS, Docker, CI/CD, ECS/Fargate*
- Built and deployed a **containerized REST API** on AWS (CodePipeline, ECS/Fargate) with automated CI/CD and provisioning, delivering production-grade reliability and scalability across data-processing workflows.

FinNexus Live | *Kubernetes, CI/CD, MongoDB, Next.js*
- Deployed a **Kubernetes-orchestrated platform** handling 1M+ transactions for 50K+ users with automated CI/CD, token-based security, and real-time scaling under high production load.

Big-Brain Live | *GCP, Cloud Pipeline, Serverless*
- Built a **cloud data platform on GCP** with an ingestion and indexing pipeline over 50K+ records, tuning performance to cut retrieval latency **40%** via serverless REST APIs.
