Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer I with 2+ years building **client/server web applications** using **C#**, **ASP.NET**, **HTML/CSS**, and **SQL Server/MySQL**. Experienced in relational database design, **stored procedures**, unit testing, troubleshooting, and collaborative remote delivery supporting member-facing healthcare technology workflows.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Database Systems, Web Technologies, Software Engineering, Object-Oriented Programming

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Object-Oriented Programming, Software Engineering, Data Structures, Database Systems

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer I *September 2025 – Present*
- Assist in design, development, and maintenance of web applications for 500+ users, writing **SQL Server/PostgreSQL** queries and tuning data access while troubleshooting defects to sustain **99%+ reliability** across client/server workflows.
- Perform **unit testing** and validation across 5K+ monthly jobs, comparing task estimates to actual delivery time while recommending application improvements with internal stakeholders in a remote-friendly collaborative environment.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed client/server web features with **HTML/CSS/JavaScript** and **MySQL (AWS RDS)** backends, handling **10K+ daily requests** through routine programming assignments, defect fixes, and structured code reviews under senior guidance.
- Reduced member-style user turnaround by **60%** by analyzing application issues, improving estimating accuracy, and applying departmental standards for maintainable coding, testing, and iterative release support.

USC AD Labs **Los Angeles, CA**
Software Engineering Assistant *January 2025 – May 2025*
- Supported application maintenance across 100K+ records with reproducible **unit-test** scenarios, clear documentation, and cooperative communication while learning assigned system standards, business context, and troubleshooting procedures.
- Contributed improvement recommendations through structured debugging, time-estimate comparisons, and cross-functional discussions that strengthened programming quality and customer-facing reliability in a research product environment.

Aasma Technology Solutions **India**
Software Engineer Intern - (VibrantChem) *May 2023 – August 2023*
- Built client/server **web dashboard** modules with **Microsoft SQL (Azure SQL)** persistence across 2M+ records, writing relational queries and schema-aligned data access patterns for responsive internal customer reporting and operations workflows.
- Executed **Jest/Mocha unit tests** and Jenkins release automation, cutting deployment cycles by **50%** while maintaining confidentiality, accuracy, and cooperative working relationships across multi-tasking engineering and QA partners.

EnterpriseApps Systems **India**
.NET Developer Intern *January 2023 – April 2023*
- Developed **C#/.NET** and **ASP.NET**-style services with **HTML/CSS** web interfaces, connecting client applications to **SQL Server** databases through queries, relational design patterns, and secure enterprise reporting workflows.
- Wrote **unit tests**, resolved UI and database defects, and participated in Agile practices to deliver reliable web features while learning VB.NET-adjacent Microsoft stack conventions and programming standards under manager supervision.

Skills

Microsoft Stack: **C#**, **ASP.NET**, **VB.NET** (familiar), .NET, MVC, Visual Studio, OOP, client/server web development, HTML, CSS, JavaScript
Database: **SQL Server**, **MySQL**, Azure SQL, PostgreSQL, relational database design, **queries**, **stored procedures**, schema design, indexing, data validation
Engineering: **unit testing**, debugging, troubleshooting, Git, Agile, time estimation, code reviews, REST APIs, remote collaboration, healthcare IT, confidentiality, problem solving, multi-tasking

Projects

MemberCare Portal | *C#, ASP.NET, SQL Server, Web Forms*
- Built a healthcare member-services web portal with **C#/.NET** services, **SQL Server** tables, and stored-procedure-backed reporting, supporting appointment and program workflows with unit-tested client/server pages for internal customer teams.

HMIS Live | *Healthcare Web App, SQL, Member Workflows*
- Developed a healthcare management web application with appointment scheduling, patient-record access controls, and structured relational schemas supporting 100+ daily member/provider operations in a regulated wellness-style service environment.

Chat2SQL Code | *SQL Server, MySQL, Client/Server, Unit Testing*
- Created a database workspace supporting **SQL Server** and **MySQL** integrations with query tooling, tested client/server workflows across 10+ systems, and validated unhappy-path behavior through reproducible unit-style verification routines.
