Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer pursuing an MSCS at USC with 2+ years in applications development and systems analysis across Java, Python, and SQL, building and enhancing secure, finance-oriented applications with strong problem-solving, testing, and a keen interest in AI.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Analysis of Algorithms, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Developed and enhanced **application systems** on SQL-backed services for 500+ users, identifying and implementing system enhancements that cut latency from 1.2s to 350ms.
- Analyzed and **debugged production applications**, implementing validation and reconciliation across 5K+ monthly jobs with CI/CD to maintain 99%+ reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Built **full-stack applications and REST APIs** integrating AI systems for 150+ users, recommending and implementing programming solutions for 10K+ daily requests.
- Conducted **testing and debugging** across development, test, and production, remediating defects and reducing turnaround **60%** while supporting customer-facing systems.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Developed application enhancements with **code analysis and script-based automation**, building 20+ test suites and security validation across three platforms with OOP design.
- Consulted with **external Microsoft/GitHub stakeholders** in Agile sprints, recommending solutions that improved response times **30%** and pipeline efficiency **68%**.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Analyzed applications to **identify vulnerabilities and security issues** using Snyk and OWASP Dependency-Check, integrating automated security gates into Jenkins CI/CD.
- Built a full-stack microservice platform syncing 2M+ records with monitoring and testing, cutting deployment time **50%** and ensuring secure, reliable releases.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built **financial application backend** (Flask, Spring Boot) for payments and booking across 50K+ records, consulting with clients to translate requirements into programming solutions.
- Debugged and **resolved production issues** via webhook automation and logging, reducing manual handling **70%** and documenting solutions for stakeholders.

Skills

Languages: Java, Python, JavaScript/TypeScript, SQL, C++, Bash
Applications Development: REST APIs, Microservices, Full-Stack Development, System Analysis, Design Specifications, Scripting
Frameworks: Spring Boot, Flask, FastAPI, Node.js, React.js, Angular
Databases: Oracle, SQL Server, PostgreSQL, MySQL, MongoDB, Azure SQL
Testing & Security: Unit Testing, Integration Testing, Debugging, Vulnerability Analysis, Snyk, OWASP
Cloud & Practices: AWS, Azure, Docker, CI/CD, Git, Agile, AI Systems, Problem-Solving

Projects

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB*
- Built a **financial application platform** (Next.js, TypeScript) for 50K+ users and 1M+ transactions with secure bank linking, token-based access, and real-time updates.

Chat2SQL Code | *Java, TypeScript, Oracle, SQL Server*
- Built an **AI-powered SQL application** supporting Oracle, SQL Server, and 8 other databases with schema-aware query generation and a Java/TypeScript codebase.

Big-Brain Live | *LLaMA-2, FAISS, GCP, REST APIs*

- Built an **AI document platform** with semantic search over 50K+ records, integrating LLMs and REST APIs on a scalable cloud architecture.
